

Pest Control & Exterminators of Oceanside Notice of Merger

September 11, 2020

September 11, 2020 - PRESSADVANTAGE -

Pest Control & Exterminators of Oceanside has been providing reliable pest control services to San Diego County for over twenty years. The company has a wide range of treatments that can handle or prevent any pest infestation out there. They have a team of expert exterminators who have all been professionally trained on treating any species of pest local to the area. They are prepared to face any pest infestation they might be challenged with.

The company has been growing like crazy over the years and plans to grow even more in the future. The president of Pest Control & Exterminators of Oceanside recently announced that the company is planning a merger deal with another smaller, local pest control company. He said, "We are always actively looking for opportunities to grow our service area which is why I am excited to announce that we are planning to merge with another smaller company. The merger, if agreed to by both parties, states that we will receive new pest control equipment, new utility vehicles, as well as new employees. This will allow us to grow bigger than ever before."

The company also recently announced that they have noticed a larger than normal number of pest infestation calls. They think that this is because people are using over the counter products but pests have adapted to these treatments. A representative of the company explained the phenomenon in a recent interview, "Everyday pest control methods that use over the counter products aren't as effective as they used to be. The main reason for this is because pests are very adaptable and have become immune to the chemicals that these products use. Since most people use these products instead of calling professionals, the pests are able to multiply and spread out of control. Professional services are now becoming the only reliable pest control solution."

Pest Control & Exterminators of Oceanside offers three major pest treatments. Their custom treatments are popular because they are guaranteed to bring the most effective and long lasting protection. Each

treatment is custom built and designed specifically for the individual pest it is meant to handle. The company is able to keep these treatments at a competitive price and will still keep it the most effective in the county. Their routine checkups are great for preventing pest infestations from ever happening in the future. Their exterminators will go to the target property and take all the proper preventative steps to make sure the pests never invade the property in the future. Finally, their emergency services are useful for when someone might be faced with a dangerous situation involving wild or distressed animals. Always leave these situations to the professionals.

Their services have received a lot of high reviews over the years and they are known for being the most reliable and affordable in the county. If people think they have a pest infestation on their property they should contact Pest Control & Exterminators of Oceanside today. They can be reached by phone or on their website at <http://pestcontrol-oceanside.com/>. Their hours are 9 a.m. to 5 p.m. on weekdays and from 9 a.m. to 1 p.m. on Saturdays. They are closed on Sundays.

An employee of the company said, "Pests spread and multiply very quickly so if people think they have an infestation on their property they should contact a professional immediately. I have seen pests take over an entire property overnight and the longer people wait the longer it will take to fix the problem."
