

Pest Busters Pest Management Hires New Staff

September 11, 2020

September 11, 2020 - PRESSADVANTAGE -

Pest Busters Pest Management has been providing professional pest control services to Covina, California. They offer a wide variety of pest control services that are known to be reliable and fast. They have a team of exterminators that have all been professionally trained on how to treat any kind of pest infestation in the area. They are prepared for any species of pest they might face.

The company has grown a lot since the first opened over two decades ago. They are constantly growing their service area and employee base. Recently, they grew just a little more by hiring two new exterminators onto their team. The president of the company welcomed them last week, "I am happy to announce the newest member of our team, Peter Beanie and Gladith McClean. Peter has ten years of pest control experience. He knows how to treat any pest in the area and has a great work ethic. Gladith has been in pest control for over fifteen years. She actively attends pest control seminars and workshops all across the country to stay up to date on the latest techniques and equipment. She has a great personality and loves helping people."

Pest Busters Pest Management recently announced that they recorded the most pest infestation calls this year than ever before. A representative of the company talked more about this, "Pest infestations are a lot worse this year because the pests are adapting to everyday pest control methods. These methods include DIY treatments and using over the counter products like pest sprays and traps. Since most people use these treatments, and they don't work very well anymore, the pests are able to multiply and spread uncontrollably. Professional services are becoming the only reliable way to control any pest infestation."

They offer three main pest control services: custom treatments, routine checkups, and emergency responses. Their custom services are popular because they are more reliable and affordable than any other pest control treatments in the area. The company is able to do this because each treatment is custom designed from the ground up to treat each specific species of pest. No two treatments are alike. Their routine checkups are also really popular because they prevent infestations from ever happening in the first place. Finally, emergency responses are useful for when people are faced with unforeseen dangerous circumstances. This usually

includes coming face to face with a dangerous animal or pest. People should always call a professional in these situations rather than trying to handle the problem themselves.

The company has a lot of great reviews for their service so if anyone thinks they have a pest infestation they should give Pest Busters Pest Management a try. Their hours are 8 a.m. to 5 p.m. on weekdays and from 8 a.m. to 2 p.m. on Saturdays. They are closed on Sundays. They can be reached by phone or on their website at <http://pestcontrolcovina.com/>.
