

Roofing Contractor in Miami Expands Services

September 23, 2020

September 23, 2020 - PRESSADVANTAGE -

Big G Roofing & More Inc., a roofing contractor based in Opa-locka, FL, who has gained popularity for its \$99/month roof, has expanded services to include impact windows, solar installation, and even HVAC. Attractive financing options are available for these services as well. They have also recently opened a new warehouse facility in Opa-Locka to better serve south Florida. Their service area now includes Miami-Dade, Broward and Palm Beach counties.

Big G Roofing is able to offer homeowners a new roof for free or for \$99 per month because they work with leading home insurance companies to help homeowners save a substantial amount on their premium, and the savings will be used for paying for a new roof. The company has a number of reliable financing companies who can provide affordable financing for a roof replacement or a new roof. The \$99 per month financing is applicable for all of their services aside from roofing and includes doors, windows, general home improvement, and now, impact windows, solar installation, and HVAC services.

Ivan Gomez, President of Big G Roofing & More, says, "We are happy to announce that we have recently expanded our services to include solar installation, impact windows, and HVAC servicing."

He adds, "We are one of the premier roofing contractors in Miami FL and has served our neighbors, friends and the community for many years as we are a locally owned business. As one of the premier roofing contractors in Miami, our services are 100% guaranteed and we are experienced in not just roofing but siding installation, exterior finishing and home improvements as well. We offer free consultations so it's never a bother to call us and schedule an appointment. We provide top-notch, quality services, especially during emergencies such as roof damages from storms or unforeseen events. Though our quality workmanship shows through on every job, our prices are fair and reasonable."

There are a number of factors that make Big G Roofing & More stand out among other roofing companies. These include their: more than 20 years of experience; master carpenters; certified installers;

insurance and license; service for the Miami Metropolitan area and more; renovation specialists; custom carpentry; free estimates; professional staff; and commitment to customer service.

For their roofing services, they are able to offer installation or repair of metal roofs, tile roofs, flat roofs, shingle roofs, and solar roofs. A new addition to their roofing services is the solar roof. They want to emphasize that solar roofs can last for more than 25 years and can pay for themselves after a number of years.

Meanwhile, impact windows and doors are important investments for the home in Miami and other areas in Florida because the area is often hit by hurricanes. Impact-resistant windows and doors have been treated with ethylene-vinyl acetate (EVA) or polyvinyl butral (PVB) to prevent the glass from shattering and sending out flying shards of glass that could harm people. Instead, the impact-resistant glass will generally remain attached to the inner membrane and the window frame.

They are also capable of providing home renovations, which may just be cosmetic changes to the current structure or more serious structural changes throughout the home. No matter what kind of renovation project the homeowner wants, it is advisable to get the services of a licensed, experienced and insured contractor. Home renovations offer a number of benefits, such as increased property value, enhanced energy efficiency, improved safety and security, and improved property appearance. As part of their service to home renovation clients, they will work with the local municipalities to obtain the required permits and licenses for the construction job.

When in need of services for roofing Miami residents and those who live in neighboring areas may want to check out the Big G Roofing & More website, or contact them on the telephone, or through email. They are open from 8:00 am to 5:00 pm, from Monday to Friday, and from 8:00 am to 12:00 pm, on Saturdays.
