Christian Roofing Advises Those Looking for ?Roofing Companies Near Me? Not to Overlook the Importance of a Thorough Inspection

September 23, 2020

San Diego, California - September 23, 2020 -
Christian Roofing has some good advice for those looking for ?roofing companies near me? in the San Diego County area. They say that no matter how small a roofing project a customer needs to be done; a thorough roof inspection should be undertaken in conjunction with that. This reputable El Cajon-based roofer even suggests people take that one step further by scheduling a yearly roofing inspection even if they are not currently experiencing any problems with their roof. Those at the company say this especially important for homeowners that have roofs that are over 10 years old.

A spokesperson for Christian Roofing says, ?The roofs on homes can play tricks on the owners at times. That?s because shingled and other style roofs can have small leaks and other problems that can?t be seen by the human eye from a distance. It?s the reason why we always thoroughly walk and inspect any roof before we start to do even a minor repair on it. This is also the best thing that we can do to give our customers the peace of mind they need that their roof is in good shape and watertight."

The company spokesperson went on to describe in more detail what their roof inspections entail. He says

that they start by looking at how well a roof has handled its aging process and if there are any noticeable structural problems or defects with it. They look for obvious signs of excess roof wear too. This includes the bubbling up of a section of shingles and finding much shingle residue in the gutters and the base of the downspouts. The company spokesperson stated that they also will check around chimneys, skylights, and roof vents for signs of leaks, look for any holes that appear to have gone through the roofing material, and also look for issues that insects, birds, or rodents may have caused. Other concerns that he says they check for are excessive areas of mold, portions of a roof that are soft or rotted, and they look for areas where water is ponding instead of running off. The spokesperson for Christian Roofing also added that all their roof inspections are done by veteran roofers that have many years of training looking for roof problems that less experienced roofers just might miss.

He went on that there are many benefits to getting annual roof inspections done. This includes catching and correcting minor roof problems before they become bigger and costlier roof repairs. A yearly roof inspection record also makes it easier to push through roofing claims if a person?s roof has been damaged by a storm or other means. Christian Roofing?s inspection services go beyond just doing roof inspections on residential properties too. According to the company spokesperson, they also have the ability and experience to do commercial and industrial building roof inspections.

Christian roofing offers a wide variety of other specialized roofing services too. The company spokesperson stated that they do all types of residential roof repairs and replacements, commercial sloped and flat roof repairs and replacements, and they are also among the San Diego County area?s most trusted solar energy contractors. This company has also established a solid reputation among those who have used their services. In his 5-star review, Kris Lambert says, ?I am really happy with this company. Johnny was the foreman and he was awesome! Such a nice guy. Patiently answered all of my millions of questions. He even took me on the roof and walked me around after the job was completed. Always quickly answered my texts too. The crew was very nice and respectful. They showed up every morning on time and cleaned up each day. I was worried about getting dirt in my pool so they covered it each day and uncovered it each night. I highly recommend this roofing company.? This review was taken from Christian Roofing?s Google Maps Listing where they average a very good 4.8 out of a possible 5-stars on the 40 reviews that have been left on that listing. Those who need a roof inspection in San Diego County or want more information on Christian Roofing?s services can call them or refer to their website.
