For advanced cleaning and disinfection of entire office space for coronavirus, they will first clean or wash all the surfaces and then apply their special sanitising solution, called Zoono-71 Surface Sanitiser, with the help of an Electrostatic Sprayer that will make the solution reach every nook and corner of the property and kill up to 99.99% germs.

They have no fixed cleaning package and offer custom quotes based on the unique cleaning requirements of a particular property. To properly analyse the cleaning requirements of an office, their team will visit the property and discuss the same with the client. At the time, clients can share their cleaning needs and recommendations with their cleaners.

Clean Group?s cleaners are all self-managed and experienced professionals and have a minimum of two years of experience in their respective fields. In fact, this is the minimum criteria for the company to hire a new cleaner. Their cleaners are regularly trained in the company?s safe & efficient cleaning practices, which are also constantly upgraded to meet the latest cleaning standards and with the best-in-class technologies.
