

Atlanta Chiropractic Clinic Posts New Blog on the Positive Impact that Chiropractic Treatments Can Have After a Car Accident

September 22, 2020

ATLANTA, GA - September 22, 2020 - PRESSADVANTAGE -

Arrowhead Clinic Chiropractor Atlanta has just posted a new blog on their website which discusses the possible impact that chiropractic treatments can have after a car accident. This clinic which is well-known for treating patient's soreness felt after a car accident. They want their patients to know that they will continue to help them in any way that they can get through this often stressful and uncomfortable period in their lives. The experienced professionals at this clinic use a combination of time-tested and newer innovative chiropractic treatments that are designed to help their patients experience short- and long-term pain relief.

The lead chiropractor at the clinic, Dr. Summer Turner, says, "One of the toughest parts of my job is listening to my patients describe the pain that they feel after being involved in an accident. One of the best parts of my job is my experience tells me I can help most of them feel better after they describe in more detail the type of soreness they are feeling. We at Arrowhead Clinic Chiropractor Atlanta are well-trained to and well-equipped to deal with a variety of auto accident-related injuries. Everyone on our staff loves what we do and we are dedicated to doing everything we can to get our patients the relief from their injuries that they so badly seek. The blogs we post such as this latest one are meant to help our patients stay positive on their road to recovery."

In the new blog, it starts by saying that chiropractors are the right choice to consult for accident-related pain because they are good at diagnosing and treating injuries that are not always obvious such as injuries to the spine and neck often can be. This is especially true with whiplash-type injuries. It went on to add that chiropractors also use non-invasive means to treat their patients so there are no worries like those that accident victims who are faced with having surgery experience. The blog mentions that chiropractors use treatments such as spinal adjustments, hot and cold applications, and strengthening and stretching exercises to get results that don't have adverse side effects. According to the blog, the chiropractors at Arrowhead

Clinic are also very used to working with the lawyers of their patients if they have filed legal claims in regards to seeking compensation for the musculoskeletal injuries that they have received in an accident. The article ended by suggesting that people consult with a chiropractor as soon as possible after an accident that has left them injured or in pain. This increases their chances of minimizing the impact of those injuries and also helps prevent long term injury-related problems.

The clinic's auto accident chiropractor review list is impressive too. There is no better measuring stick as to how well a clinic performs its services than numerous positive reviews. Belinda Powell states, "I love this office. The front desk staff is always friendly and very professional. They greet each client by name and explain what is about to happen that day. Dr. Turner is the best. She always explains in detail what she is about to do and how that relates to my care. She also listens to me when I express my reactions about my treatment. Thank you, staff of Arrowhead-Cascade." This is one of 570 reviews that was left on Arrowhead Clinic Chiropractor Atlanta's Google Maps Listing. Incredibly this clinic maintains a 5 out of possible 5-star average even after having that high amount of reviews written on their services.

Dr. Turner added, "For those in the Atlanta area that are suffering from pain after an accident and would like to book a free consultation with us or get directions to our Atlanta clinic, that can easily be done by calling us, sending us an email, or by filling out the consultation request form on the homepage of our website." She also mentioned that they not only treat vehicle accident-related injuries but also sports injuries, injuries from slip & fall accidents, workplace injuries, and other types of neck & back discomfort.
