

Dr. Karen Glerum Expands Cosmetic Dentistry Gallery on Website

September 03, 2015

September 03, 2015 -

BOYNTON BEACH, Fla. ? Karen Glerum, DDS, who practices general, restorative and cosmetic dentistry in Boynton Beach, announced today that her practice has expanded the ?Before and After? photo gallery on its website. The additional ?Smile Gallery? shows the results of 34 procedures performed by Dr. Glerum. Each gallery image expands into a case study that describes how the patient benefited from cosmetic implants, crowns, bridges, and more.

?There?s a tendency to trivialize the smile as superficial, but this is short-sighted in my experience,? said Dr. Glerum. ?While of course everyone wants to have a nice smile, in a lot of these cases, we are seeing lives changed through an improved smile ? it affects self confidence and personal appeal in the workplace.?

The case studies highlighted in Dr. Glerum?s new ?Before and After? gallery tell stories of patients who had been passed over for promotions at work before transforming their overall appearance through cosmetic dentistry. In one case, a patient had gold teeth in a ?rapper grill? appearance she had considered cool until she went looking for a job. After replacing her gold teeth with porcelain implants, she was able to get a job at a law firm.

Dr. Karen Glerum graduated from Loyola College in Maryland with a degree in Biology. She finished near the top of her class at Georgetown University School of Dentistry in 1984. Dr. Glerum then came to Florida to pursue advanced residency training at the Miami Veterans Hospital and Jackson Memorial Hospital ? a level of training achieved by only 10% of dental graduates in the United States. She established her own practice soon after residency and began serving the Boynton/Delray community in 1987.

Location Information is available on the website. For more Information, click [here](#).
