

Great Reviews Continue to Pour In for What Some Consider to Be the Best Microwave Vegetable Steamer

October 05, 2020

LITTLETON, MA - October 05, 2020 - PRESSADVANTAGE -

Cestari Kitchen is thrilled with all of the attention that one of its latest quick and easy kitchen cooking products is getting. This relatively new product is what they call their "Microwave Vegetable Steamer". It not only can cook vegetables in under three minutes but it can also be used to cook omelets for breakfast, poach eggs, and even do other kitchen cooking tasks such as roast meats. Favorable reviews for this popular online cooking product have been coming in at a rapid pace from many of the company's retail sources.

The company spokesperson, Susan MacDowell, says, "With people being so health & time-conscious these days we knew we wanted to develop a kitchen product with that firmly in mind. Our company had some experience making vegetable steamers in the past so we wanted to start with that concept and vastly improve upon it but we also wanted to keep the product simple to use and clean. We knew that when we eventually came up with our latest version of our microwave vegetable steamer, we had something unique and special on our hands. What we never expected is so many purchasers to claim it was the best microwave vegetable steamer that they had ever used.

MacDowell went on to say that on Amazon alone the company has now received 190 reviews on the product

in the short time it has been out in the marketplace. She added that those at the company are even more pleased that the overall majority of these reviews have been overwhelmingly favorable. The company spokesperson attributed this to all of the hard work and research that went into making this product among the top one's shoppers will find in the food preparation marketplace.

In some examples of this innovative product's Amazon reviews, Lori Judd says, "At this point, I have only used this product to steam vegetables, but it does its job to a T. Broccoli comes out tender and green with this handy steamer. I used to use water in a plastic bag, but that usually got messy when the bag popped its seam. No more! This product is no-muss, no-fuss. Add a little lemon juice and garlic to the water in the bottom for some added flavor to your veggies. I can't wait to try something else in this little gem."

In her 5-star review, Kim T. says, "So many ways to cook with the Easy Pod! Light, functional, easy to store, and a breeze to clean up. What else can you say about your favorite new kitchen tool. I love asparagus and now it's so easy to steam in the micro. Just add your favorite seasonings and three minutes later - boom. The clasp on the top secures everything inside and takes no effort - no more fumbling with tin foil or Tupperware lids. Also, the bottom is flat so it won't roll around and spill. I haven't had a chance to bake yet but look forward to it. Recommend!"

Another reason this product is getting many best microwave vegetable steamer reviews is how versatile it has proven to be. Users state they can do much more with it than steam just vegetables. Some have even come up with some very creative uses for this innovative cooking product. Lainie1 wrote, "I purchased this to make no-knead bread calling for a cast-iron Dutch oven. I can't lift those any longer and thought I'd give this a try. Well, at 450 degrees, it came out perfect. Opened it after 20 minutes to allow it to continue browning. I plan on trying it for other purposes and have ordered another." In another 5 out of 5-star review verified buyer Leigh states, "Great gadget. Beautifully roasted potatoes and small beef rib roast in the oven. Steamed fresh vegetables perfectly in the microwave. Cleans up easily washing by hand. Definitely will purchase another. Would like to see some in a slightly smaller and larger size, considering this one to be medium?"

MacDowell also added that people like this product for many other reasons besides the fact that it's simple to use, versatile, and saves time in the kitchen. She says this includes that their Microwave Vegetable Steamer is made from safe 100% BPA-free silicone material and can easily handle the high heat generated during microwave cooking. It is made to European safe cooking standards which are well-known to be even stricter than those set forth by the FDA. More about this product can be seen on this small family-owned Massachusetts company's website.
