

Destin Residential Painters Launch New Website

October 12, 2020

October 12, 2020 - PRESSADVANTAGE -

Accurate Painting of NWFL, based in Niceville, FL, is pleased to announce that they have recently launched their brand-new website. They are the preferred exterior and interior painting contractor for residential homes and commercial buildings in Niceville, Sandestin, Miramar Beach, Destin, 30A, Santa Rosa Beach, and all along the Emerald Coast of Florida. Aside from painting, they also offer other services, such as epoxy coatings, deck sealing, paver sealing, pressure washing and more.

James Stackhouse, Director of Sales and Marketing at Accurate Painting, says, "Is your home in need of some TLC? Do you need to freshen up a rental for the season? Accurate Painting of NWFL is a fully licensed and insured painting company with over 15 years of professional experience backed by over 20 years of industry product knowledge. From new residential construction to repaints, we have the quality driven experience and the coating product knowledge to provide a solution that meets your needs. Let us restore the beauty of your home."

Accurate Painting of NWFL has worked with some of the most reputable custom home builders over the years. They always use high-quality paint and take the time to prepare the home or business of the client. This preparation before the actual painting work is vital to the success and the life span of the paint job that they provide. Those who want to get more information about Accurate Painting may want to view the

company Facebook page.

Another service offered by Accurate Painting is epoxy floor coatings. In Northwest Florida, there is a lot of sand, salt and even dirt that can damage garage floors. Whether it is a new home or an older one, epoxy floor coatings can help add a layer of protection to the floor. This layer helps repel grease, paint, antifreeze spills and more. It will hold the concrete together better because it is a solid layer holding the top in place. Choosing an epoxy coating for the garage floor is an easy decision. Epoxy floor coatings are tough, durable and versatile. It will make the garage floor look much nicer than just bare concrete. It is also suitable for living spaces.

They also provide wood refinishing, which can bring back the original finish and luster of wood parts of the home, such as doors. While wood refinishing can be a do-it-yourself work, it cannot be done quickly. While this DIY project may not necessarily damage a home, the homeowner may lose a lot of time on it because of inexperience.

Those who are interested in interior and exterior painting services for their home or building may want to check out the Accurate Painting of NWFL website or contact them through phone or email.
