

EPS Landscaping & Tree Service Announces Tree Services In Pembroke Pines Florida

October 12, 2020

Pembroke Pines, Florida - October 12, 2020 -

Florida-based EPS Landscaping and Tree Service LLC is pleased to announce that they are now offering professional tree services to residents of Pembroke Pines, Broward County and the surrounding areas. EPS Landscaping and Tree Service provides every type of tree service from planting to cutting and removal. Complete details can be found on the company's website at <https://epslandscaping.net/tree-services>.

Tree planting is a great way to add beauty and color to lawns because it does not only make lawns more beautiful, it also has the added benefit of helping absorb carbon dioxide and polluted air which helps people breathe better. It can also be good for mental health as the presence of trees can help reduce stress and anxiety. Planting a tree can be done by the homeowners themselves but the results will most probably not be too great. This is because not all trees can grow and thrive in the locations that they are planted in. Most do not have the knowledge needed to plant trees in the most optimal locations for growth. For the best tree planting results, it is better to ask for assistance from tree planting professionals.

Professional tree planting costs money but homeowners can benefit greatly from such services in the long run. For example, trees protect homes from the harshness of the sun's heat, which means that homeowners with trees planted on their property will not need to use as much energy to keep their homes cool. In line with this, EPS Landscaping & Tree Service provides important advice to help their customers make sure that the trees they plant grow to be strong and healthy.

EPS Landscaping and Tree Service also offers tree installation. The company explains that tree installation requires thorough planning, offering the trees planted enough space to grow while also making sure that they are not too close to homes and power lines. It is also necessary to avoid adding extra soil as it is better to plant trees in soil that is natural to the area. Effective drainage must also be allowed to occur in the soil or else the roots of the trees will drown.

It is also important to hire a professional tree service provider because the locations that homeowners select to plant their trees in may only be suitable in the early stages. However, as trees grow larger and roots grow out, a number of complex problems may occur. They may hit power lines and the trees' roots may shake the foundations of nearby houses. As trees grow, additional support must also be given to them during the first year so they are protected against damage.

Another service that EPS Landscaping and Tree Service offers is tree relocation. Whether it is because the tree has grown too large for its original location or homeowners simply want to move it into a different place, instances where people want to move their trees are not unheard of. In these situations, expert tree relocation can be done so people will not have to kill their current trees and plant new ones. However, relocating a tree is difficult, which makes it important for property owners to consult with the right experts. EPS Landscaping and Tree Service has the experience and the equipment needed to relocate trees safely.

Furthermore, the company offers tree trimming services. Most may not think too much about tree care. However, as trees grow, issues can occur. For example, branches can grow too long and weigh trees down. Too many branches can also keep rain from getting to the garden below the trees while dead branches can fall off and damage nearby properties. Tree trimming services can ensure that these situations do not occur and that trees stay healthy. Tree trimming can also make trees look even more beautiful and emphasize the trees' natural shapes.

EPS Landscaping and Tree Service's wide range of professional tree services also include tree pruning and removal as well as landscaping services such as tropical landscaping and pool landscaping. Customers may connect with EPS Landscaping and Tree Service LLC on their website or social media to stay up to date with their news and announcements.
