

EPS Landscaping & Tree Service Offers Irrigation And Lawn Sprinkler System Services

October 13, 2020

Pembroke Pines, Florida - October 13, 2020 - PRESSADVANTAGE -

Pembroke Pines, Florida based EPS Landscaping & Tree Service LLC is pleased to announce that they are providing irrigation services, including lawn sprinkler installation and repair, to the residents of Broward County, Florida and the surrounding areas. More information about the company's irrigation services can be found at the following link: <https://epslandscaping.net/irrigation-services/>.

Greg O'Connell, a representative for EPS Landscaping & Tree Service LLC, says, "Irrigation and sprinkler systems are critically important to ensure the long-term health of your lawn, and this is even more true in hot, sunny areas like Broward County. If you don't have a good irrigation and sprinkler system, you'll soon find that your lawn starts to dry and then eventually becomes a shadow of its former self. However, if you don't already have an irrigation system, you don't need to worry. EPS Landscaping & Tree Service is ready to equip you with the best irrigation system to suit your needs."

According to the company, although a fully-featured irrigation system complete with all amenities (like rain

sensors and smart systems) might seem like a luxury purchase, this is not really the case. In places like Broward County, where the constant heat requires that lawns and yards be regularly watered, an irrigation service system will soon pay for itself over time. Smart irrigation services can help prevent common lawn issues like overwatering, underwatering, uneven watering, mushy lawns, inefficient water use and more. With a rain sensor, homeowners can also ensure that the sprinklers will not turn on during rainy seasons, wasting water and power.

Installing an irrigation and sprinkler system with EPS Landscaping & Tree Service starts with a survey of the property where an expert from the company will inspect the house and lawn and run some tests. During this period, the property will be divided into zones based on how much water each area of the yard needs ? as some places, like garden beds, will require more water and different types of sprinklers than the lawn. Following the inspection, if the homeowner wants to proceed, EPS Landscaping & Tree Service will start the installation process.

The company is also quick to assure their community that irrigation and sprinkler system installations are not all that complicated. According to EPS Landscaping & Tree Service, today's sprinkler systems require minimal trenches, and as such, result in minimal damage to the lawn. Since the sod in lawns can be removed for construction and easily replaced afterward, homeowners may not even be able to tell that an irrigation service took place at all.

The company also provides a thorough irrigation repair service. If sprinkler systems are draining improperly or missing essential parts of a yard, the company recommends that homeowners have the system repaired. As EPS Landscaping & Tree Service says, even the best system can wear out over time, and the best way to make sure that everything is working properly is to conduct routine maintenance.

O'Connell says, "As a full-service lawn care company, we have been providing reliable, courteous and fairly priced services to the South Florida area ever since we opened up shop. We are a family-owned and family-run business, and our goal has always been to exceed our clients' expectations while keeping our pricing at competitive levels. Our clients' satisfaction is our top priority, and we can assure you that, with more than 25 years of experience in the field, we are very well prepared to handle all your lawn maintenance needs and ensure your satisfaction."

In addition to the installation and repair of irrigation and sprinkler systems, EPS Landscaping & Tree Service also provides other services, such as landscaping, tree services and general lawn care and maintenance. The company's service areas include North Miami-Dade, Broward and South Palm Beach Counties.

Those who want to learn more about EPS Landscaping & Tree Service LLC and the services they offer are welcome to visit the company's website for more information. The company maintains a presence on Facebook where followers may make requests for further details or browse the media the company shares of their work. They also encourage their clients to get in touch with Greg O'Connell directly via email or phone if necessary.
