Love And Care HVAC Sponsors Virtual California Brewers Festival

October 07, 2020

October 07, 2020 -
Love and Care Heating & Air, based in Elk Grove, California, is delighted to share that they will be sponsoring the 2020 California Brewers Festival. This event supports many local charities and important community organizations.

The company is a yearly sponsor of this festival, and every year, they aim to raise funds for Point West Rotary and Rotary International. The California Brewers Festival has grown to be the capstone event of the season for beer enthusiasts in Northern California. This year, due to the COVID-19 pandemic, concerns rose about keeping the community safe. In order to continue this event and also ensure the wellbeing of the local populace, the festival will take place in an entirely virtual environment. The festival will be featuring one brewery per week online for several weeks.

Christopher Shaw, owner of the company, points out that Love and Care Heating & Air is built on the principles of exceptional customer service and integrity. Given their California location, they are able to provide their heating and air conditioning services to Sacramento and all surrounding cities. They are also involved in the community, hence their support for events such as the Brewers Festival. Learn more about

the company here: Love and Care HVAC.

Errin H. gives the company a high rating on their Facebook page, stating that she would, ?Highly recommend this company. Professional, knowledgeable and amazing customer service. [They are] honest, and most of all, they care about their customers. Great group of guys: Chris, Derek, Marshal, Jose, Lucas and Tyler.?

The company also offers a wide range of other services. They service all types of residential heating and air conditioning, no matter what brand. Christopher Shaw, one of the owners, has earned a ?box-full? of service awards over the years and has seen it all when it comes to equipment problems. Shaw is an expert at diagnosing the problem and is able to explain it simply in layman?s terms. The team at Love and Care has received direct training from Shaw as well. Love and Care is also proud to announce they are providing the amazing Air Scrubber Plus in the upcoming months. The company will provide the unit and install it for most HVAC systems for just $795 (it is worth noting that the normal price is $1,200). The company is also offering free installation for customers who buy a new air and heating system. The company highlights that the system is the same one used on space crafts and the space station to help keep astronauts healthy. It is proven to remove allergens and also helps in fighting many transmittable diseases, which may be particularly apt for the current global situation. The Air Scrubber Plus cleans allergens, viruses and bacteria such as Staph, E. Coli, MRSA, Strep, Hepatitis A and more.

A well-maintained system ensures comfort and has the added benefit that legitimate safety concerns are addressed and alleviated when an experienced technician handles the equipment. Heating and air systems either run on natural gas, propane or electrical energy (or some combination thereof). The potential for damage, if any one of these supply components were to be compromised, is extremely high. Over time, when equipment turns on and off many times a day, circuits can be damaged or weakened causing sparks and or failure. All of these circuits are inspected during regular maintenance. The company offers Service Tune-Ups to ensure efficient systems.

Christopher Shaw explains that the company vision blends trust, honesty and integrity with skill, accountability and expertise to deliver industry-leading equipment, installed by technicians who are trained and vetted as well as respectful to both the individual and the home. They also make sure that their employees are given fair pay, benefits and possibilities for growth while maintaining a professional but enjoyable environment to work in. In turn, their employees allow the company to realize their vision of creating and maintaining an organization that places an emphasis on family, community and sustaining a real desire to be the most beloved air conditioning and heating company in the industry.

Those interested in the services provided by Love and Care Heating & Air may visit their website for additional details or to schedule an appointment. Similarly, one may contact the company?s representatives directly via phone or email to follow up on any further inquiries.
