Missame LLC, a business based in Sacramento, CA, has announced that the release of a new eBook, 'Looking Fabulous - Makeup Tips and Fundamentals'. This eBook is provided for free to any customer who purchases their set of ten makeup brushes. When someone purchases the set, they will receive a printed brush guide that includes instructions to the eBook download.

"Many of my customers are fairly new to using makeup brushes and they might feel a little intimidated," explains Amy Ng, founder of Missame LLC. "I want them to feel comfortable using the brush set by providing more guidance."

Since the brush sets were first released, a number of customers had asked questions in terms of how to actually use them. While a handy brush guide is included that describes what each brush does, this does not go into any real detail about how to best apply makeup. Considering the set includes ten brushes, many women who have purchased the set admitted to only using one or two, because they simply did not know what else to do. This was the philosophy behind the creation of the eBook.

The eBook contains 64 pages of the most important hints and tips to create beautiful results with makeup. These include how to use the new brushes, in what order makeup should be applied, how to contour and highlight, how to choose the right colors for eye shadow, and how to remove makeup. Some basic skincare tips are also included.

The makeup brush set itself is comprised of professional standard brushes with premium synthetic hair. The handles are made of high quality bamboo. It also comes with a travel case holder. The set has proven very popular with many customers. Many have even stated that the quality is far superior compared to the more expensive brush sets, particularly because they are made from sustainable materials and don't lose their brush hairs.

While the set is of professional standard, it is also a great makeup brush set for beginners. This is particularly true now that the eBook is included. It allows anyone to apply their makeup with near professional standard.
