

Revitalize You MD in Roswell GA Offers Weight Loss Management Programs

October 14, 2020

October 14, 2020 -

Revitalize You MD, a med spa based in Roswell, GA, has announced that they are offering customized medical weight loss management services. These are designed to fit an individual?s lifestyle, present situation, and health goals. In addition to individual services such as health coaching, IV therapy, exercise programs, their line of supplements, and meal planning, they offer customized package programs that add greater value to their patients.

They offer a 21-day active weight loss plan, using HCG injections, which is then followed by a three-week maintenance plan. Human chorionic gonadotropin (HCG) is one of the hormones found in men and women and is responsible for the regulation of certain metabolic functions of the body. When injected, the HCG stimulates the body to burn adipose fat. And when combined with a low-calorie diet, HCG may be able to help the patient lose weight between one-half to one pound every day.

The HCG diet offers additional benefits aside from weight loss. These include: enhanced metabolic function,

increase in energy, healthy weight reduction, decrease in cholesterol levels, preservation of muscle integrity, hormone regulation, no associated hunger, and enhanced endurance.

Revitalize You MD also provides other services, such as: P-Shot or PRP penile injection; platelet rich plasma (PRP) treatment; microneedling; dermal fillers; IV therapy; hormone replacement therapy; and Botox. Those who would like to get more information regarding these services may want to follow their Facebook page.

The P-Shot is for sexual dysfunction and makes use of plasma-enriched growth factors in the patient?s own blood. A small amount of blood is drawn from the arm of the patient, after which the blood is spun in a centrifuge to separate the PRP from the platelet-poor plasma. The PRP is re-injected into the penis, stimulating blood flow and allowing the penis to become rejuvenated and larger.

PRP treatment can also be used for other purposes. It can be used to rejuvenate the skin, and repair scars and stretch marks, and restore hair growth. This is based on the ability of PRP to utilize the patient?s own cells and activated platelet growth factors for the production of stem cells. This stem cell response stimulates the collagen-producing cells to generate new blood vessels and collagen, fatty tissue.

Microneedling is used for treating various kinds of skin conditions. It entails the use of multiple tiny, sterile needles for the purpose of puncturing the skin and causing physical trauma. This medically induced trauma is designed to stimulate the derma to rebuild. It may help with a number of skin-related problems, such as scarring, wrinkles, stretch marks, skin pigmentation issues, loose skin after liposuction or weight loss, and rosacea. It may also be used to deposit medication, such as vitamin C or topical tretinoin, deeper into the skin to help in the treatment of various issues, such as acne scarring.

Juvederm and other dermal fillers are gel-based products that are injected to rejuvenate the skin of the face by getting rid or reducing wrinkles, or replace lost volume in the soft tissue. Reasons for using dermal fillers include: reduction of smile lines; improve the cheek bones and other facial features; balance out the jawline or the chin; smoothen wrinkles and tear trough; plump up thinning lips; and more.

Revitalize You MD also provides immune boosting intravenous (IV) therapy, which is a method for feeding nutrients such as vitamins, minerals, and amino acids directly into the bloodstream for the treatment of intracellular nutrient deficiencies.

Meanwhile, hormone replacement therapy may be used by both men and women. For men, it may be used for treating andropause and low testosterone levels. For women, it may be used for treating hormonal imbalance. Botox is a kind of injection that may help get rid of years of wrinkles after one session.

Those who are interested in the weight loss programs offered by Revitalize You MD may want to check out their website, or contact them on the phone, or through email. They may also want to view their Google Maps listing to know their exact location and other important information. They are open from Monday to Friday, from 9:00 am to 5:00 pm.
