

NJ Center For Cool Sculpting Offers Body Fat Elimination Procedures

October 14, 2020

October 14, 2020 - PRESSADVANTAGE -

Summit, New Jersey plastic surgery clinic NJ Center for CoolSculpting is offering CoolSculpting services to anyone who wants to eliminate body fat. A local division of Ethos Spa, NJ Center for CoolSculpting is among the best New Jersey clinics for this particular procedure.

CoolSculpting, a process that is scientifically known as cryolipolysis, is a leading non-invasive treatment that reduces fat by first freezing and then eliminating it. Developed to be a pain-free alternative to other fat-reduction treatments (like liposuction), it is an innovative procedure that contours the patient's body by freezing unwanted fat. CoolSculpting can target the fat in several areas of the body, such as the arms, stomach, thighs, breasts, buttocks and submental space.

CoolSculpting treatments are FDA-approved and extremely safe to administer. As NJ Center For CoolSculpting explains, the process is very simple as well. First, patients will sit down with a physician for a consultation to discuss treatment goals and form a plan. Typically, one procedure will eliminate roughly 20%

body fat at the target area, and most people achieve their desired results with just one CoolSculpting treatment. However, those who want a more dramatic result can always opt to undergo three or more treatments, which will be spread out over a six- to eight-week period. Due to the non-invasive, pain-free nature of the treatment, there is no real recovery period to worry about either, and patients can resume normal activities immediately after treatment, including working, studying, exercising and so on. More information about CoolSculpting and the clinic's other services can be found at the following link: [GMB Website](#).

Dr. Hardik Soni of NJ Center for CoolSculpting, says, "More often than not, you will find that fat is very stubborn – no matter how well you diet or how hard you exercise, there are parts of your body where fat will just never go away. But that's all a thing of the past with CoolSculpting. At NJ Center For CoolSculpting, we are absolutely committed to providing the safest and most effective treatments to reduce stubborn, unwanted fat from your body. Our mission is to help you look and feel your best, both inside and out."

He continues, "With an experienced team of board-certified doctors, certified aestheticians and licensed physician assistants who are collectively regarded as national leaders in body contouring and the industry-leading CoolSculpting equipment, we are able to provide nothing but the best for all of our patients. If you want CoolSculpting done in NJ, we are your best choice."

NJ Center For CoolSculpting's dedication to their patients has allowed them to become an established part of the community. In a review shared on the clinic's website, Leslie Hamilton says, "The treatment itself was not uncomfortable. Afterwards, I felt great. I didn't really notice anything for about 30 days. After day 30 until about a month later, I started noticing that my favorite jeans were not as tight anymore. I wasn't having to suck in to get them buttoned. And by that two month period after my CoolSculpting procedure, I was back in my favorite pants, and they felt great."

Meanwhile, on the Google platform, the clinic has an excellent rating of 4.8 out of 5 Stars. In her review, Leslie Barber writes, "I've always been the type to prefer hitting the gym instead of using fancy treatments, but I just couldn't get rid of my stubborn belly fat, so my sister told me about CoolSculpting. It was so much easier than I thought it would be – Dr. Soni walked me through everything and made sure I was completely comfortable before we even started. The results have been awesome!" More reviews can be found at the clinic's [GMB listing](#).

Those who want to learn more about NJ Center for CoolSculpting and the services they provide can find further information in the clinic's website. In addition, NJ Center for CoolSculpting also maintains a page on Facebook where they frequently post updates, share media and interact with their patients. Interested parties
