

Get Rid Of Double Chins With Back To 30 And Their Kybella Treatments

October 12, 2020

October 12, 2020 -
Greenville, South Carolina-based medical spa Back To 30 is inviting the general public to learn more about Kybella treatments and get in touch if they wish to schedule a consultation for this procedure. Back To 30 is dedicated to providing hormone therapy and non-invasive advanced aesthetic solutions to the Greenville community as well as several other locations across the United States.

Kybella is a non-surgical and minimally invasive injectable treatment that is used to reduce the appearance of a double chin in as few as two to four treatments. It is composed of deoxycholic acid, a biocompatible molecule that occurs naturally within the human body. This molecule assists with the breakdown and absorption of fat. With Kybella injections, the deoxycholic acid is used to destroy fat cells (specifically under the chin) to eliminate the appearance of a double chin. It is the only injectable treatment approved by the FDA to eliminate submental fat.

Caren Collins of Back To 30 says, ?Having a double chin is no fun. It makes you look older than you are and

just affects your appearance negatively. By eliminating your double chin, you can improve your appearance and gain a youthful and slender look. The only problem is that surgery for a double chin can require days or weeks of downtime, significantly higher costs and pose more serious risks to your health. However, that?s not an issue anymore. With Kybella, you get the same, lasting results without needing any downtime or any additional maintenance procedures.?

To get started with the Kybella treatment, patients need to consult with a Back To 30 medical practitioner who will closely examine the patient?s chin and neck to determine if they are a viable candidate for it. The number of treatment sessions a person requires will depend on the amount of the submental fat they have. Kybella injections are performed in Back To 30 locations and will only take about 15-20 minutes, allowing the quick and convenient procedure to easily fit into one?s schedule.

Back To 30 explains that, during the Kybella procedure, the specialized solution is injected into the fat beneath the chin. The injections are targeted into specific areas based on the person?s anatomy and fat deposits. Once the injections are complete, the patient can return to work or their normal activities immediately.

Kybella?s results may be visible within just one to two days; however, many patients require at least two to four treatments before they achieve their desired results. Each treatment is spaced about one month apart. Overall, most patients see a significant reduction or elimination of submental fat and their double chin. Back To 30 assures that once desired results have been achieved, no further treatments or maintenance injections are required.

Back to 30 provides Kybella treatments at their Upstate South Carolina locations, serving Greenville, Spartanburg, Anderson, Simpsonville and Boiling Springs. As the first beauty clinic in these areas to provide patients with this advanced treatment, Back to 30 boasts the most professionals with training and experience with this injectable treatment, as well as a high rate of success and patient satisfaction.

The medical spa services provided by Back To 30 have earned the company a lot of praise from their clients. On their Google Maps listing, Back To 30 has a rating of 4.3/5 Stars. Brittany Johnson says in her recent review, ?Brought my sister over for a little fun day, and Back to 30 really made our bonding time extra special. We opted for the chemical peels and then did some laser hair removal. Thinking of getting the Botox with my momma.?

Meanwhile, in another review, Betty Reiley writes, ?Had a great experience! My Botox was perfect, very natural and not frozen or heavy! Clear and Brilliant helped me with the lines on my forehead that wouldn't go away! Last but not least, my filler for my cheeks and lips was wonderful! Beckie brought my younger youthful look back exactly how I asked her to and performed it perfectly! I could not be happier!?

Those who want to learn more about Back to 30 and their services are welcome to visit the company's website.
