PG Environmental Services Inc. Monitoring Wells in Long Island

October 13, 2020

October 13, 2020 -
Amid the global pandemic, water sanitation should never be compromised, according to PG Environmental Services Inc., the Leading Metro New York Environmental Services.

In line with this, the environmental servicing company offers monitoring wells services. Monitoring wells are usually used in the calculation of the amount of water that can be extracted from any given reservoir without overusing the same resource as well as the flow of the subterranean water. It is usually drilled into the ground and has a small diameter.

In addition, monitoring wells are mostly drilled around Superfund sites or a hazardous waste management facility to get groundwater samples for various purposes. These include a biological, physical, and chemical analysis that helps determine the types, amounts, and distribution of the contaminants found in the groundwater below the site.

According to PG Environmental Services Inc, monitoring wells is also crucial in the visualization and monitoring of groundwater storage and underground movement. It also prevents contaminated water from

being used for irrigation or consumption.

The environmental servicing company is an expert in monitoring wells because they have the latest tools and adequate expertise required for the task. "We have been in operation for fifteen years and are renowned for being the Leading Monitoring Wells service in Long Island," the company adds.

PG Environmental Services offers the best Monitoring Wells services in Long Island along with its other subsurface explorations and geotechnical investigations services. Their other services include groundwater sampling, soil sampling, geotechnical, and underground tanks (UST) or aboveground tanks (AST) removal and excavation.

The company provides its clients with the highest standards of quality control and quality assurance. "We are able to maintain such high standards through the work of experienced drillers and helpers," she adds.

PG Environmental Services has been serving clients in New York since 2017. Since then, PG Environmental Services has been gaining the trust and confidence of its clients throughout Long Island and the Metro New York Area, including Manhattan and the Boroughs (The Bronx, Brooklyn, Manhattan, Queens, and Staten Island).

Meanwhile, as the world battles against the virus, the company likewise assures to implement stringent safety measures while on operation. Team members of the company also use personal protective equipment while on service. Aside from that, they also assure to impose social distancing.
