

Missame LLC Branches Out And Launches New Bath Bombs

September 15, 2015

September 15, 2015 -

Sacramento, California based Missame LLC has recently branched out from just makeup tools and accessories and announced a new product launch. The company is now offering bath bombs, which are available as a gift set and can be purchased through the Amazon marketplace.

Missame LLC released a set of makeup tools several months ago on Amazon that were very well-received by their customers. Their new bath bomb product comes in a variety gift set, and the company states that all of the bath products they provide are 100 percent handmade and individually packed in the United States.

Amy Ng, founder of Missame, stated, "Our newly launched product has been warmly received and this is evident in the customer reviews we have been receiving about it. We're very happy to be releasing this new gift set, and have high hopes for it, as we do with all of our future product releases."

The bath bombs are aimed at women, although the company states that anyone, man, woman, or child,

would be able to enjoy using them. "We carefully select every product that we sell, ensuring that our customers receive the highest quality. We're sure that everyone will love our latest choice," states Ng.

This is currently the only product of its kind from the Missame line, although the company has hinted at releasing more, similar products in the future. "We take all of our product launches very seriously," states Ng. "We always take the time to ensure that the products are completely natural, free of parabens or any sodium lauryl sulfate. Our customers expect nothing but the best."

Since their launch, the bath bombs have become quite popular on the Amazon marketplace. Customers state that the scent, as well as the overall luxuriousness of the product, are what keep them coming back to the Missame line.

Famed for their professional makeup brush set, Missame LLC offers cruelty-free beauty solutions including lash combs and other tools, in addition to their newly added bath bomb gift sets. The sets are currently available on Amazon and more information can be seen on Missame's official website.
