

Options Medical Weight Loss in Orland Park Has a New Website

October 23, 2020

October 23, 2020 - PRESSADVANTAGE -

Options Medical Weight Loss - Orland Park, a weight loss clinic located in Orland Park, IL, has announced that they have recently launched their new website. The clinic has a team of weight loss professionals who can guide people, from how to safely lose weight fast to how to keep a healthy weight after reaching their target weight. Those who live in Orland Park and neighboring areas like Tinley Park, Palos Hills, Homer Glenn, Lemont, Frankfort and Mokena, and Oak Forrest can check out their services. The clinic offers medically supervised weight loss plans, which include their version of the successful ketogenic diet and the hCG diet. Their weight loss plans are supervised by trained medical weight loss professionals.

A representative for Options Medical Weight Loss - Orland Park says, "Our weight loss plans are also designed to make sure that our patients are able to lose weight safely. We have recently launched our new website to help site visitors find what they are looking for more conveniently. It also means that people would be able to view our website properly on their mobile gadgets."

One of their medical weight loss programs is their own version of the ketogenic diet, which is suitable for people who are trying to lose from 10 to 110 pounds for a period as short as six weeks up to 34 weeks. A weight loss doctor will prescribe one of their weight loss medications to help patients curb their appetite and hunger. In addition, they can provide lipotropic fat burning injections to speed up the fat burning process. And one of their professional weight loss counselors will educate, motivate, and coach the patient weekly in trying to reach the weight loss goal.

For individuals who prefer not to use weight loss medications, there is the non-prescription program. It also makes use of their trademarked ketogenic diet program and goes in intervals of six and ten weeks. Each program will be guided by weight loss counselors whose role will be to coach, educate, and motivate the patients in reaching their goal.

And for patients who want to lose weight fast, there is the Fast Options Program. With this option, individuals can lose up to 65 pounds in just 10 to 12 weeks. The program uses a combination of the hormone HCG, lipotropic fat burning injections, prescription medications, their Options Diet System?, and Dr. Simeon?s HCG protocol. As usual for their weight loss programs, a weight loss counselor will be providing weekly guidance.

They also offer the a la carte option, which includes a number of prescription medications, lipotropic fat burning injections, one on one weight loss counseling, B12 injections, Options meals and snacks, Options Diet System?, the hormone HCG, and more. Patients can also select from any of their services and do one or as many as they want.

One of the weight loss medications they can prescribe is phentermine, which works by decreasing hunger and increasing metabolism. It is able to do that by stimulating the hypothalamus gland and activating several neurotransmitters for the purpose of suppressing appetite.

They may also prescribe Phendimetrazine, which has been noted to be more potent in reducing appetite and boosting metabolism. It functions by stimulating the central nervous system to increase heart rate and blood pressure, while decreasing appetite. Another prescription weight loss drug that may be given is Diethylpropion. It has a shorter half-life than phentermine, which allows it to be used later in the day and have less impact on the person?s sleep.

People who are interested in knowing more about the medical weight loss programs provided at Options Medical Weight Loss ? Orland Park may want to visit their website, or contact them on the phone or via email. They are open on Mondays, Wednesdays, and Thursdays, from 8:00 am to 1:00 pm and then from 3:00 pm to 7:00 pm; and on Fridays and Saturdays, from 8:00 am to 2:00 pm.
