

Options Medical Weight Loss Launches New Website

October 23, 2020

October 23, 2020 - PRESSADVANTAGE -

Options Medical Weight Loss, a medical physician-supervised weight loss clinic, has launched a new website that is accessible at <https://optionsmedicalweightloss.com/>. The clinic has multiple locations in and around Chicago at Chicago South Loop, Glenview, Chicago Lakeview, Naperville, Orland Park, and Park Ridge. The clinic also has locations in the states of Arizona at Chandler/Gilbert and in Ohio at Gahanna. The clinic was named the #1 weight loss center in 2018 via Youth Health Magazine.

The company claims to offer a holistic approach to weight loss. The company uses techniques such as FDA approved appetite suppressants including Phentermine as well as other prescriptions used for weight loss, weekly one-on-one weight-loss counseling, Lipotropic fat burners, B12 injections, HCG injections, the company's trademarked diet plan called the Options Diet System, specially designed and manufactured Options meals and snacks, personalized and customized Options supplements, and more.

The clinic's ketogenic diet program can be supplemented with prescription medications. The clinic says that the program is ideal for anyone trying to lose 10 pounds to 110 pounds with a duration as short as six weeks and up to thirty-four weeks. If the patient opts for supplements, they are prescribed one of many weight loss medications to help with appetite and hunger. The program also offers Lipotropic fat burning injections to enhance the fat burning process. Finally, the program offers weekly meetings with its weight loss counselors to help coach, educate, and motivate the patients to their goals.

The clinic's HCG system program is designed for those who require fast results to prepare for an important event or life milestone. It is a ten to a twelve-week program that is designed to shed up to 65 pounds. The clinic uses a combination of prescription medications, the hormone HCG, Dr. Simeon's HCG protocol, lipotropic fat burning injections, and the clinic's trademarked Options Diet System. To cope with the rapid transformation, the clinic partners the patient with one of its weight loss counselors weekly.

The clinic also offers monthly and an à la carte options for patients who do not want to attempt losing weight

aggressively and prefer self-controlled moderate diet changes. Patients opting for the monthly options can schedule a monthly B12 injection and fill prescriptions at their own pace. Finally, all of the tools in the clinic's arsenal are available for those who prefer to pick and choose their treatment as an à la carte option. The clinic also offers a vitamin C injection as it is known to boost a patient's immune system by increasing the production of new white blood cells called lymphocytes and phagocytes. Injected vitamin C skips the long process of digestion and therefore can be fully absorbed by the patient's body.

According to the clinic's spokesperson, "Our approach to weight loss is multi-pronged. We understand that an individual's weight loss journey is not always an easy process. The journey doesn't end when one hits their target goal weight but extends well beyond that milestone. It is equally as hard and also important to maintain the goal weight. This arduous process involves making a long term lifestyle change. These lifestyle changes may include carefully crafting an ideal diet, ample exercise, and reducing stress. We have over 19 different individually tailored weight loss programs to choose from, aiming to meet your specific lifestyle, habits, and goals. We have something for everyone. Our commitment to the patient is at the heart of our success."

The company's website can be used to schedule a free consultation through the information request form. The contact page also contains phone numbers for all of the clinic's locations in Illinois, Arizona, and Ohio. Patients can also reach out to the clinic at (888) 405-5673 for scheduling a free consultation at their nearest center. The website has a gallery showing the weight loss journeys of real patients. The website also links to online stores for every location. These online stores can be used by patients to buy meals and snacks.
