

Buzz?s Bee Removal of Brookhaven Provides Pest Control to Local Residents

October 21, 2020

October 21, 2020 - PRESSADVANTAGE -

Buzz?s Bee Removal of Brookhaven is a pest control company that is providing professional pest control to the local residents of DeKalb County. The company boasts a team of ten exterminators who have been professionally trained on each type of stinging pest in the area. They specialize in stinging pests so they can treat any species of bee, wasp, or hornet that might be infesting a property. They offer normal extermination services, routine checkups, and prevention methods.

They are open every day from 8 am to 5 pm and would love to help anyone in need of reliable pest control solutions. A representative of the company said in a recent interview, ?We are excited to be offering pest control services to DeKalb County. Our team of professionally trained exterminators have been through hours of rigorous training and are ready to tackle any infestation no matter how big or small. Our services are affordable and are custom built depending on the species of pest we are treating. Using customized methods like this enables us to keep our prices low while also guaranteeing a sting-free future for our customers.?

Their extermination services are super reliable and are surprisingly fast. Their team quickly arrives at the target property and immediately locates the beehive or wasp nest. Then, they plan the best way of removing

the pests. This is where the customization comes in. They determine the way to remove the pests in the least damaging, fastest, safest, and most reliable way possible. Once the pests are gone, they will repair any damages inflicted by the pests.

Their routine checkups are great for people who want to prevent an infestation from ever even happening in the first place. Their team will routinely arrive at the target location and will analyze the property to make sure there are no pests trying to invade or build a new home anywhere near. If they do find pests, they will quickly remove them before the problem gets any worse. These checkups can be scheduled monthly, quarterly, bi-annually, and annually and they do not require a contract. This means that customers can cancel at any time.

Their final service is their prevention methods. Buzz's Bee Removal will take all of the necessary preventative measures to make sure that pests don't come back in the future. They use eco-friendly sprays and industrial equipment to return the best results. These services are extremely reliable and makes it easy for their customers to never have to stress about being stung on their property again.

The company has been busy in their first month of being open by helping hundreds of people with various sizes of infestations. If anyone is in need of professional pest control solutions, they should contact Buzz's Bee Removal of Brookhaven today. The faster they can help, the less damage the pests will be able to do. They can be contacted by phone or on their website at <https://www.buzzsbeeremoval.com/service-areas/brookhaven-georgia/>.
