Buzz?s Bee Removal of Cartersville Announces New Merger

November 02, 2020

November 02, 2020 -
Buzz?s Bee Removal of Cartersville has been providing reliable pest control solutions to local residents and business owners for over a decade now. They offer professional commercial and residential pest control services to anyone in Bartow County. Their team specializes in stinging pests so they can handle any species of bee, wasp, or hornet. They are constantly growing their service area in order to protect as many people as possible against stinging pests.

The company just announced last week that they are going to be merging with another local pest control company. The other company has decided to remain unnamed for the time being. The merger deal was announced by the president and states that Buzz?s Bee Removal will receive all new pest control equipment. There will be enough to supply their entire team. They plan on using the old equipment as a backup in case the new equipment needs worked on in the future. This will allow them to perform exterminations at any time.

They will also be receiving brand new utility vans. The other company has already prepped these vehicles for pest control so they are set up to store all of the necessary equipment and supplies for a successful pest removal job. The vans are 2018 models and don?t have very many miles on them. This will allow their team

to more reliably arrive at target properties on time and allow their team to stay better organized with their equipment.

Finally, the merger states that they will be receiving new exterminators to add to their team. The head of human resources for the company said in a recent interview, ?We are happy to announce that this merger is going to not only allow us to expand our resources but will also help us expand our team. We are hiring three new exterminators onto the team when the merger goes into effect. This will help us protect more people than ever before in this company?s history.?

They are known for their pest extermination services but also offer routine checkups and pest prevention plans. If there is a honeybee infestation they will safely relocate the bees to a local beekeeper instead of exterminating them. Their services are reliable and affordable and their team has speed in mind. Pest infestations happen quickly and should be handled just as fast. This is why their team offers 24/7 protection so that they can handle any infestation no matter what time it is.

If any homeowner or business owner in Bartow County is in need of professional stinging pest control services they should contact Buzz?s Bee Removal of Cartersville today. They can be reached by phone or on their website at www.buzzsbeeremoval.com.
