Pest Control Merger To Combat Fall Pests

November 02, 2020

November 02, 2020 -
With the weather changing pests are going to be looking for a warm place to stay for the winter. This means that there is a higher chance of them finding their way inside of a home or business. Buzz?s Bee Removal of Bainbridge has been dealing with a lot of these cases recently and to combat it, they have decided to do a merger with another local pest control company.

The merger states that Buzz?s Bee Removal will receive brand new pest control equipment, three new staff members, and five new pest control vehicles. The new equipment is industrial grade and will help them better perform their job and more reliably remove any pests from the target property. The new members will allow them to expand their service area in order to help more people than ever before. Finally, the new vans have already been prepped for pest control and will allow their team to stay more organized as well as more reliably make it to any property in the area.

A representative of the company talked about the merger in a recent phone interview on a local news station, ?Every year pests become more of a problem during the Fall season. We are taking the proper preparations to ensure that the community stays safe and protected during this time. To do this, we have agreed to a merger with another smaller pest control company in the area. This will grow our team size and provide us with new equipment and vehicles to better perform our pest control jobs. This allows for better protection for

more people than ever before.?

The other pest control company has decided to stay unnamed for the time being. The merger is set to go into effect on Tuesday of next week. This merger will allow the local resident and business owners to be comfortable knowing that their property is safe from future infestations. If anyone currently has a stinging pest infestation on their property, they should contact Buzz?s Bee Removal immediately.

Pest infestations should be taken care of quickly to minimize the risk of future damage or someone getting stung. An employee of the company said, ?Pest infestations occur relatively quickly and should be handled in the same manner. Pests will continue to multiply and spread across the property. When they do this they can cause significant damage to the structure they are near.? If anyone in Decatur County needs professional pest control services they can contact Buzz?s Bee Removal of Bainbridge today. They can be reached by phone or on their website at www.buzzsbeeremoval.com.
