

Roof.net Receives Another Exceptionally Positive Customer Review

October 28, 2020

Fairfax, Virginia - October 28, 2020 -
Roof.net, a roofing contractor based in Fairfax, VA, is proud to announce that they have received another exceptionally positive customer review on Google. The customer expressed his deep satisfaction with the quality of the work provided by the roofing contractor with regards to the replacement of his townhouse roof. The company has been enjoying a long streak of five-star reviews as can be seen by their 5.0 overall rating on Google after accumulating more than 400 reviews. This recent review can be viewed at https://goo.gl/maps/HwEc1XBn3WvyUMRB6.

Giuseppe D., the customer who gave a five-star rating for Roof.net, said, ?I?m very pleased with the quality and craftsmanship of the work done by Ken B. and his roofing crew. They replaced the roof on my townhouse on the day and time promised. In addition to replacing the shingles they had to replace a fair number of the underlying sheets of plywood. This was all done with the upmost professionalism and courtesy by both Ken and his crew. I really appreciate how thoroughly they cleaned up after themselves. At the end of the day if it wasn?t for an outstanding looking new roof you would not be able to tell that they were there. A 5 star job.?

Ken Briesemeister, owner of Roof.net, says, ?We would like to thank Giuseppe for taking the time to leave a five-star review on Google. Although we?ve received tons of five-star reviews, we are always pleased to get a new one because it means that we continue to provide the five-star customer satisfaction that we have always aimed for.? These five-star reviews have also been converted into videos, which can be accessed through their YouTube channel at https://www.youtube.com/playlist?list=PLAW2_gEwtnuYyDzY09LD92xhFFeCknbTl.

A roof replacement is a significant investment for the homeowner, which is why homeowners who get a high-quality roof replacement service are truly pleased. In addition, having a reliable roof for the home is vital, particularly in Northern Virginia where they often experience extreme weather. Ice storms, heavy snow, strong winds, and torrential rains can put a lot of stress on roofs and those that are not well-built are likely to get damaged. And then there is the aesthetics factor for a well-built roof, which can drive up the value of a home substantially.

Roof.net is capable of providing various kinds of roofing services in Fairfax and neighboring areas. These include roof inspection, roof repair, roof replacement, and roof cleaning. It is important to know that the roof begins to deteriorate the moment it has been installed, which is why having the roof inspected regularly is important. Inspections are designed to detect any hidden roof leaks. Water getting through the roof can cause serious problems for the home. Aside from causing ugly stains on the ceiling and walls, the moisture can damage the supporting structures of the home. There is also the danger of black mold that can cause health problems for family members.

Roof.net can provide detailed roof inspections for the home. They will inspect the roof and attic, looking for signs of leaks and sufficient ventilation. Damage to the roof, such as missing or cracked shingles are easy to find but issues related to water and too much humidity because of lack of air flow are much harder to detect. There may be visible signs of black mold, rot, and mildew but those that are just starting are harder to detect. Damp insulation is also a problem because it is less effective than when it is dry, which means that energy costs could increase. To ensure that they can detect water damage that cannot be seen by the naked eye, the professionals from Roof.net use infrared moisture detection.

One of the key services provided by Roof.net is emergency roof repair. With the extreme weather experienced by homes in Northern Virginia, some homes may find themselves in need of emergency roof repair. This is important because it is not a good idea to postpone the repair of a damaged roof because water getting inside the home can cause further damage to the home, furniture, and more.

Those who are interested in roofing services in Fairfax and surrounding areas may want to check out the Roof.net website at http://roof.net, or contact them on the phone or through email.
