PG Environmental Services Offers Complete Range Of Subsurface Explorations, Geotechnical Investigations

October 28, 2020

October 28, 2020 -
The Leading Metro New York Environmental Services, PG Environmental Services, offers a complete range of subsurface explorations and geotechnical investigations.

The full-service environmental servicing company is based out of Hauppauge, NY. They are offering subsurface investigations to determine bearing capacity and suitability for future construction. It is accomplished with a modern fleet of trucks, all-terrain ATV drill rigs, and portable remote access drilling units. These rigs are operated by experienced drillers who utilize driven casing by direct push technology (DTP), hollow stem auger, and mud rotary drilling methods.

The company has been in business since 2012. Over the years, the company has implemented best practices and procedures, placing service, and clients first. They are known in the industry for their highest standards of quality control and quality assurance.

PG Environmental Services says, "The reason for our growth and stellar reputation is due to our professional, on the job service with experienced and certified drillers. Our clients give us high ratings because of our

attention to detail and the ability to get the job done cleanly and efficiently. We place our clients first."

The Leading Geotechnical Data Services in Long Island also boasts of its highly-qualified workforce. Their professional staff is all trained on stringent safety standards and state of the art technologies.

Apart from its clients, the company also puts its employees first. PG Enviro is insured with an A-rated carrier, "Excellent" by "A.M. Best Company." Their insurance programs offer a "True" occurrence form general liability coverage with hazardous pollution and with limits of $10M each occurrence and with $10M in the aggregate. They also carry the statutory limits for worker's compensation and disability as mandated by the State of New York.

The company offers the following services: Groundwater Sampling, Soil Sampling, Monitoring Well, Geotechnical, Ground Penetrating Radar, and UST / AST (underground tanks (UST) or aboveground tanks (AST) Tank Removal and Excavation.

For geotechnical drilling, they have equipment that is available for both onshore and offshore projects and can drill in any terrain or location. They complete projects, both large and complex, without sacrificing performance and providing quality samples. They also offer the client both hollow-stem auger and rotary drilling featuring the following drilling rigs: Low Clearance, Small ATV Track, Large ATV Track and Rubber Tire, and Large Truck Rig.
