Introducing The Dog?s Bed: A New Generation of Orthopedic Beds for Relief of Joint Pain in Dogs

October 29, 2020

October 29, 2020 -
Los Angeles, California: Orthopedic mattresses have long been used by people to alleviate stress on the spine and reduce joint pain. They work by aligning the body correctly and boosting circulation, which in turn reduces inflammation, which results in a reduction in pain.

It is now possible to get one for the canine family member so they can now reap the benefits of weightless sleeping, and pet guardians credit The Dog?s Bed Orthopaedic with restoring their dog?s mobility, vitality and helping them to sleep soundly.

It has solid high-density memory foam over a high-stability premium support base, that not only gives dogs with painful conditions such as arthritis and hip dysplasia the ultimate in orthopedic comfort, but looks great too.

?We have a 14 yr. old, 105 lb. Lab that has a problem getting up after a nap, and looses stability on her rear legs occasionally. One 2 hour nap on this bed and she stood up on her own with no assistance. The next day, she walked the 2 acre perimeter and started up the porch steps before I could help. She hasn't walked that in months! I believe this bed will add years to her life.? - ?Jelly Bean? verified purchaser, Nashville, TN.

The Dog?s Bed comes in multiple sizes with removable covers to make wash days easier, and to top it all, it has a waterproof mattress protector, making it a great option for seniors.

The Dog?s Bed and spare covers are available on Amazon.

The Dog?s Bed is a family company founded by dog lovers and ?driven by a desire to improve the lives of as

many dogs as possible?. They involve vets and animal behaviorists in the development of their products, and extensive testing is carried out by third party companies to establish efficacy and safety prior to release.
