

Midway Pest Management Offers Pest Control Services in Kansas City

November 05, 2020

November 05, 2020 - PRESSADVANTAGE -

Midway Pest Management, a company based in Overland Park, KS, has announced that they are offering pest control services for Kansas City and neighboring areas. They offer various kinds of services, including residential pest control, commercial pest control, rodents and wildlife control, termite control, bedbug control, and bird control. They offer 3 tiers of pest control based on what each client specifically requires. Tier 1 is general pest control, Tier 2 is general pest plus mosquito control, and Tier 3 is general pest plus mosquito and flea and tick control. Each tier is provided on a bi-annual or quarterly basis.

Their skilled and experienced technicians are also experts in controlling rats and mice. During the initial consultation visit, they will conduct an inspection of the interior and exterior parts of the property. They will determine all of the rodent entry points, food and water sources, potential harborage, and nesting sites outside and inside. After providing a free rodent survey, they will suggest rodent control methods and preventative services. Their rodent control service can be hired as a one-time service or as a regularly scheduled rodent preventative service.

For the company's rodent and wildlife control, they will conduct a preliminary visual inspection of various areas of the home or commercial establishment. These include the attic, soffit, crawl space, vents, siding, and areas that could provide access for wildlife. They will look for animal damage on ductwork, wiring insulation, and other indications to accurately identify the animals that are causing the damage. They will provide the homeowner or property owner with a personalized inspection report, which details the specific needs for the home or building and describing all of the service alternatives as well as an itemized estimate for any suggested wildlife control services that they can provide. Those who would like to know more about the company can follow their Facebook page.

Midway Pest Management offers various wildlife control services. These include: squirrel removal, raccoon removal, bat removal, bird removal & control, skunk removal, rodent removal & control, dead animal removal, and more. They offer a two-year guarantee for their rodent control services, which means that if clients experience the same problem within 2 year, they will conduct another rodent control service free of charge.

Termites can cause significant damage to a home or building. That is why they also offer termite control services. Wooden structures are at high risk of damage due to termite feeding. In the Midwest, the type of termite that feeds on wooden structures is the Eastern subterranean termite (*Reticulitermes flavipes*). This particular termite has been causing over \$5 billion in damage every year in the United States.

Midway Pest Management has state certified commercial pest control technicians who will conduct a preliminary termite inspection to determine if active termites are present, termite-related damage, or old or abandoned termite shelter tubes. They will then recommend termite treatment based on their findings.

The company also offers bedbug control. They will first determine the level of infestation and then come up with the best course of action for the specific situation. They can provide chemical/residual treatments, fumigation, and remedial heat treatment. The most appropriate treatment will be determined after they have conducted a thorough inspection.

Birds have been observed to enter vents in the Kansas City Metropolitan Area and Johnson County. They tend to build nests inside the dryer vents, bathroom vents, and exhaust vents. This can impede air flow and the vents and exhaust tubes are usually damaged by birds. Thus, Midway Pest Management also offers the most effective bird control approaches that will fit the specific requirements of the client. They can provide commercial, residential, and industrial bird control solutions in Kansas and Missouri.

Those who would like to know more about the pest control services may want to check out the Midway Pest Management website, or contact them on the phone, or through email. They are open from Monday to Saturday, from 8:00 am to 6:00 pm. Those who like to know about their location and other important information may want to check out their GMB listing.
