

Sight of Beauty Offers Coolsculpting Service in Plainview NY

November 06, 2020

November 06, 2020 - PRESSADVANTAGE -

Sight of Beauty, a medical spa based in Plainview, NY, has announced that they are offering CoolSculpting, which is the leading non-invasive fat reduction treatment in the US. It is designed to target those bulges that are exceedingly difficult to get rid of through exercise and diet. The idea is to freeze the underlying fat cells in the target areas while not harming the skin or surrounding tissue. The body gets rid of the frozen fat cells through a process known as cryolipolysis, which means that fat is reduced in that particular area.

Dr. Samuel Baharestani from Sight of Beauty says, "Please note that CoolSculpting results are dependent on the experience and technique of the person performing the fat freezing procedure. Unlike other CoolSculpting Long Island providers, Sight of Beauty med spa does not just train estheticians to perform this technique sensitive treatment. Our CoolSculpting technicians have medical backgrounds and extensive training in performing body-contouring procedures. The unparalleled experience and expertise of our technicians is one reason why discerning patients choose Sight of Beauty for their fat freezing treatments."

It should be noted that several scientific studies attest to the efficacy and safety of cryolipolysis. And there are a number of reasons why people choose CoolSculpting. These include: fat reduction without need for surgery; the fact that it is clinically proven and FDA cleared; the fact that it provides long-term results; minimal to zero downtime, which means that patients can get back to their normal routine almost immediately; the fact that millions of CoolSculpting treatments have already been performed; and the fact that it can result into the formation of attractive curves. Those who would like to know more about Sight of Beauty can follow their Facebook page.

Sight of Beauty makes use of state-of-the-art equipment and facilities. Their new CoolSculpting applicators decrease the treatment time to just 35 minutes while enhancing patient comfort. They also allow the targeting of additional areas on the body that are not usually reached by most other fat reduction treatments. Among the possible treatment areas are: belly fat; love handles, hips, and flanks; thigh fat; upper arm fat; bra bulge and back fat; and neck fat and double chins.

It should also be noted that Sight of Beauty medical spa also offers other treatments. For instance, they also provide dermal fillers, which are volumizing substances that are used to fill in wrinkles to make the skin appear smoother and younger. These are particularly effective in counteracting the signs of aging in the lower part of the face, such as the nose, lips, and chin area. The fillers used are all biodegradable substances, which means that these substances eventually break down and are safely absorbed back into the body.

Also provided at Sight of Beauty is Botox treatment, which is a safe and FDA cleared treatment for smoothing wrinkles and fine lines that usually found on the brow, forehead, and around the eyes. The results of Botox treatment, when done by a skilled injectionist, are dramatic and maintain facial expression for natural-looking outcomes.

They also offer chemical peels in which a biologically active solution is applied to the skin. This treatment may help in improving sun damage, acne blemishes, freckles, age spots, and uneven pigmentation. When chemical peels are combined with facial treatments, the result is uniform exfoliation that exposes glowing and vibrant skin.

They can also provide laser hair removal, which helps people avoid the daily routine of plucking, shaving, and tweezing to eliminate unwanted facial and body hair. Their advanced hair removal laser system makes getting rid of unwanted hair safer, more comfortable, more effective, and faster. This laser hair removal system is suitable for all types of skin and provides quick results.

Those who would like to know more about the CoolSculpting service and other services offered by the med

spa may want to check out the Sight of Beauty website, or contact them on the telephone or through email. Those who would like to know their exact location and how to get there may want to check out their GMB listing.
