

The Youth Fountain Jeuveau Wrinkle Treatment Is Being Offered In Freehold, New Jersey

November 05, 2020

November 05, 2020 -
The Youth Fountain, a dermatology clinic in Freehold, NJ, is offering CoolSculpting, laser therapy, weight loss procedures, and aesthetic services. The clinic is run by Dr. Emil Shakov and Dr. Rada Shakov.

The clinic offers skin care treatment such as tattoo removal, IPL, laser genesis, Picogenesis, chemical peel, Dermapen, vein treatments, hair removal, and SecretRF. The clinic also offers treatments for injectables such as Botox, Dysport, PRP, and Jeuveau. They offer body sculpting services such as EmSculpt, Coolsculpting, truSculpt iD, Mesotherapy, and Laser Liposculpting. They offer wellness treatments such as IV infusions, weight loss, anti-aging, hormone replacement, and peptides. Finally, they offer techniques for hair restoration such as medical treatment, laser cap, mesotherapy, PRP, and surgery.

Their Botox, Dysport, and Jeuveau offerings are similar injectables that are formulated to smooth lines and wrinkles on the upper areas of the face. The doctor helps the patients determine which injectable best suits their needs during their personal consultation. Those three treatments help improve aesthetic problems like

forehead lines, crow?s feet, glabellar area (frown lines between the eyebrows), ?bunny? lines (wrinkles across the top of the nose when someone scrunches their face), gummy smile (when smiling if the upper gums are overly exposed), dimpled chin, and platysmal bands of the neck. Patients can follow the clinic on its Instagram Page to stay up to date with before and after pictures of real patients.

FDA-approved Botox, Dysport, and Jeuveau are all made from purified botulinum toxin type A and can be used in almost identical ways. The treatments begin with an in-depth assessment of the patient?s skin. Dr. Shakov assesses the degree and depth of the wrinkles in question to determine how many units will be needed to meet the patient?s needs. They are well-tolerated treatments. As with most injections, the patient may experience the feeling of a sharp prick followed by a slight stinging sensation. To lessen this discomfort, the doctors will apply a topical anesthetic as needed to lessen the sting from the needle prior to the injections

The doctor urges the patients to plan for hour-long appointments. The actual time for injections is quite fast, but Dr. Shakov likes to ensure that each patient is given a thorough assessment before treatment begins. Aside from some minor redness and swelling, most patients have no recovery time at all. The Youth Fountain even has several patients who come in for Botox on their lunch breaks. The full effects usually take between 3-10 days to develop. The treatments are priced by the unit, not by the areas of the face the patient is being treated for.

Dr. Emil Shakov is a board-certified surgeon at The Youth Fountain with extensive experience and training in advanced surgical techniques, advanced aesthetics, anti-aging, weight-loss, and hair transplantation. Fellowship trained in Advanced GI, Bariatrics, and Minimally Invasive Surgery (MIS), he continued to further his training and education at The American Academy of Procedural Medicine and The American Academy of Aesthetic Medicine where he claims to have mastered aesthetic procedures, anti-aging, and medical weight-loss. Dr. Rada Shakov is a board-certified gastroenterologist at The Youth Fountain who specializes in all aspects of aesthetic medicine.

When asked about their work methodology, Dr. Rada Shakov says, ?I believe in seeing the patient as more than just their problem areas. We believe in taking an emphatic and whole-body approach. We help our patients become the best possible version of themselves. We pride ourselves on the fact that all our procedures are performed by us, two board-certified physicians.?

According to a customer testimonial by Rachel K., ?Dr. Rada Shakov and Dr. Emil Shakov are the finest doctors around. They are not only knowledgeable in their field but are also incredibly kind, helpful, and care tremendously about their patients. So happy with my outcome and I would highly recommend them and their wonderful office staff to anyone. I'm so glad I found them!? Patients can follow the clinic on its Facebook Page to stay up to date with more customer reviews.

Interested patients can call 732.333.5992 or request a personal consultation through the contact page on the clinic?s website.
