

## Diamond Rock Spring Water Offers Water Coolers

*November 06, 2020*

November 06, 2020 - PRESSADVANTAGE -

Ridgefield Park, New Jersey bottled water supplier Diamond Rock Spring Water is pleased to announce that they have a variety of water cooler products on offer. Diamond Rock Spring Water is dedicated to providing high quality clean drinking water to the Bergen, Hudson, Essex and Union Counties as well as the surrounding areas.

Richard Picinich, a representative for Diamond Rock Spring Water, says, "Having a water cooler has become an essential part of many households. While some houses do have drinkable tap water, you should always opt for pure, spring water because it's just better. It tastes better, it has more benefits and it is refreshing in a way that tap water simply cannot be. Of course, you can't just have a spring run by your house, so you have to go for the gallon jugs, and there is no way you can drink straight off that. That is where a water cooler comes in."

He continues, "Having a water cooler is also handy for both the summer and winter months when you just need some cold or hot water. If you're just drinking off the tap, you don't really have much control over the temperature of your water. However, you have a water cooler, and that is not a problem at all. Any time you

want, you get water that is perfect for you.?

Diamond Rock Spring Water offers a selection of water coolers that can be purchased directly from their website. Models available from the company include the Aquaport Mini Cooler, Brio CL800 Stainless Steel Hot & Cold Water Cooler and more.

Diamond Rock Spring Water has been in business since 1994. The family owned-and-operated company gets its natural spring water from a pristine area in the Kittatinny Mountains protected by land preservation. Picinich is quick to boast that their water is Government tested, FDA approved and licensed by the NJ State Department of Health. Customers may choose between 8oz., 16.9oz., 1 Liter, 1.5 Liter, 3 gallon, 5 gallon and single gallon cases of natural spring water. In addition, they offer distilled water in 5gal. or single gallon varieties. Diamond Rock is also a direct distributor of all Keurig K-Cups and Brewers, offering at least 140 different brands of K-Cups.

Picinich says, "At Diamond Rock Spring Water, we are guided by an ongoing philosophy: providing access to quality water to all the residents of the communities we service. We make it easy for them to choose Diamond Rock Spring Water by offering competitive pricing and personal service."

The quality of the products and the dedicated service provided by Diamond Rock Spring Water has earned the company a strong positive reputation in the local community. On their Google listing, the company has a rating of 4.6 out of 5 Stars. A user going by J. says in their review, "Just signed our company up with water service from them. The owners and staff were so kind and professional. They were able to get our water delivery and cooler out to us the next day. Also threw in some free gallon jugs and a free month. Looking forward to supporting some local business."

In another review, David J. Francisco shares his experience with the company, writing, "I have been a customer for 10 years. I visit Diamond Rock frequently to pick up my spring water and coffee. The quality of service and their products surpass all other vendors. I have also had deliveries of both water and coffee to my home. After reading the negative comment about Diamond Rock and its owners/staff, I strongly disagree. Yes, misunderstandings may occur, but Diamond Rock has always had the customer's satisfaction and interests in mind."

Those who want to learn more about Diamond Rock Spring Water and their products and services are invited to visit the company's website to get started. They encourage interested parties to get in touch with Richard Picinich directly via email or phone, or alternatively, the company can also be reached through the contact form on their website. Diamond Rock Spring Water maintains a Facebook page where they frequently post

updates, share media and communicate with their customers.
