

Central Texas Spine Institute Provides Minimally Invasive Back Pain Therapies

November 06, 2020

November 06, 2020 -
Austin, Texas-based Central Texas Spine Institute is reaching out to the wider community to share that they are providing minimally invasive back pain therapies for anyone suffering with a bad back or spinal issues. The private medical practice, which ranks amongst the best spine centers in the US, offers comprehensive spine care, including diagnostic services, conservative treatment modalities and spine surgery.

Dr. Randall F. Dryer, founder of Central Texas Spine Institute, says, ?Having a bad back ? or really, any kind of back pain ? can be a severe impediment to leading a normal life. It can be a terrible burden to bear, which is why at Central Texas Spine Institute, I lead a team of experienced physicians and physical therapists who are dedicated to helping people dealing with spinal issues. We are glad to say that not all of our methods are invasive; in fact, we have a number of non-surgical approaches to treating back pain as well.?

Central Texas Spine Institute?s range of conservative care and treatment programs include medications, injections, rehabilitation, physical therapy and spinal cord stimulation. In addition to these approaches, the

clinic also offers minimally invasive spine surgeries for those who need it.

However, Central Texas Spine Institute?s services are not limited to non-invasive or minimally invasive methods. Being among the best spine centers in the United States, they offer a comprehensive range of therapeutic and surgical services. These include orthopedic stem cell treatment, endoscopic discectomy, lumbar fusion, epidural steroid injections (ESIs), motion preservation, artificial disk replacements and more.

Dr. Dryer says, ?If you have an issue with your spine or you think you might have an issue with your spine, it is vitally important that you get it checked out as soon as you can. It can make the difference between spending your days in unbearable pain and spending them comfortably. If you act early, you can avoid any need for invasive procedures and correct whatever is happening with simple, straightforward treatments.?

The excellent medical services provided by the Central Texas Spine Institute have earned them heavy praise from their patients. On the Google platform, they have a rating of 4.5 out of 5 Stars from over 200 reviews. In a recent 5-Star review, Kevin Boissonneault says, ?I provided him with an MRI on my lower back. He was detailed in his discussion about the problem I was having. Did and epidural steroid injection in my back. I feel 100% again. My wife has to remind me to slow down but after several years of pain, it is so nice to be pain free again. Great doctor. I recommend Dr. Dryer if you are having lower back pain. He was the 4th doctor I had gone to, I wish he had been my first!?

Meanwhile, in a review on their Facebook page, Jonathan Carlson writes, ?I went into Dr. Dryers office limping, leaning sideways and barely able to walk from the worst sciatica pain ever. Dr. Dryer was able to diagnose the pain and told me exactly what needed to be done. Recovery from the surgery was very minimal, and I was pain free. The staff is very friendly and make you feel like family. It?s a very comforting feeling. I highly recommend Dr. Dryer for back/neck issues. Thank you, Dr. Dryer, for giving me my life back!?

Central Texas Spine Institute?s Dr. Randall F. Dryer is an award-winning spine surgeon and respected innovator in stem cell therapies. Since 1988, Dr. Dryer has been treating patients in Central Texas and from all over the world. His work has been published in peer-reviewed journals, and he has earned numerous awards, including being named among the top 100 surgeons in the US by Becker's Spine.
