

## **The Key Guys Still the Leading Car Locksmith in Minneapolis, According to Their Google Reviews**

*November 10, 2020*

MINNEAPOLIS, MN - November 10, 2020 - PRESSADVANTAGE -

The Key Guys are proud to announce that they continue to be the leading car locksmith Minneapolis residents can rely on, as evidenced by their Google reviews. They currently have over 500 reviews on Google with an overall rating of 4.9 out of 5.0 stars. This means that practically all of their reviews are five-star reviews. Going through their reviews, one will immediately notice that it would be extremely difficult to find a review with a rating that is lower than five stars.

For instance, Kevin P. gave them a five-star rating and said, "I lost my car keys during a recent move. I called the dealership and was quoted something which was way out of my budget. The key guys were able to make me a new door/ignition key for far less. The service was quick and professional." In another recent review, Ann B. also gave them a five-star rating and said, "He was really friendly and quick about his work. They got me a new key within 10 min of showing up."

The Key Guys are able to do car keys and everything to do with car keys from helping replace batteries (a

good idea as the cold weather approaches) to completely replacing and programming car keys and fobs. They provide 24/7 different types of car locksmith services and are the oldest provider of such specialty service in the state of Minnesota.

The professional car locksmiths at The Key Guys are car key specialists. They also keep themselves updated on new technology, such as the remote keyless system (RKS), which made the use of key fobs increasingly popular. With such developments in technology, their work is not longer just about car key cutting. The auto locksmiths at The Key Guys are also capable of adding and upgrading the features of the car key fob. Thus, those who need a key fob replacement may want to call them.

With this new technology, new problems have also come up, such as the hacking of key fobs by car thieves to create an unauthorized duplicate. That is the reason why the key experts at The Key Guys needed to keep themselves updated on new technology, such as the key fobs and other technology developments. They have also been posting articles on their blog to make sure that more people are aware about such developments.

Meanwhile, most new car models now have car keys provided with transponder chips as a way to safeguard against car theft. With these transponder keys, locksmiths do not just have to make sure that keys are cut to fit the locks and ignition; they will also need to program the transponder chip to ensure that it will respond properly to deactivate the immobilizer system and allow the owner to start the car. The transponder chip emits a low-level signal and this is detected by a receiver around the ignition cylinder. The car computer authenticates this signal to determine whether the real key is being used, thus minimizing the risk of car theft.

The Key Guys have developed an excellent reputation in the Twin Cities because of their quick and competitively priced auto locksmith service. They are ready to provide car locksmith services 24/7, which means that car owners no longer need to have their car towed or find themselves locked out of their cars for an extended period of time. And no matter what kind of car key is lost, they can replace it because of their team of specialized locksmiths who are both knowledgeable and experienced in all aspects of car keys, keyless entry systems, and key fobs.

They can provide a broad range of services to auto owners, car shops, and car dealers. These services include the replacement of lost or stolen keys; programming of a car key; repair of broken keys; removal of broken keys from the ignition; cutting of a new key; provision of a spare or backup key; repair of ignition and doors; replacement of batteries; and transponder programming.

People who are in need of car key replacement and other car key services available through The Key Guys

may want to visit their website, or contact them through the telephone or via email. They can be contacted 24 hours a day, every day of the week.
