Clean Group Manly Introduced High-Quality Office Cleaning Package at Affordable Cost

November 17, 2020

SYDNEY, NSW - November 17, 2020 -
Clean Group Manly (https://g.page/office-cleaning-manly?share), a commercial cleaning services company based in Manly, NSW, Australia, has revealed that they are providing office cleaning services in Manly and neighbouring areas. They have developed a team of cleaners who have been trained in infection control to offer cleaning, sanitising and disinfection services for offices, strata cleaning and other commercial establishments. They will help make sure that the business premises are sufficiently clean and sanitised in offices.

In view of the Covid-19 threat, they have upgraded their cleaning methods to ensure that they will be able to effectively deal with common viruses, bacteria and other harmful microorganisms in the office. They have developed an office cleaning service that focuses on phones, doors, switchboards, computer keyboards, and other items that are often touched by people, to ensure protection against the novel virus.

The highly trained cleaners from Clean Group Manly (https://sites.google.com/site/commercialcleaningsydneynsw/cleaning/sydney/manly-beach-nsw) make use of the I-mop, a machine wash and cleaning tool that combines the power of an industrial scrubber machine with the flexibility of a mop to clean sticky floors and hard to reach places effectively. They also make sure to use environmentally-friendly cleaning solutions, such as Viraclean. This is an eco-friendly and efficient commercial cleaning solution that has been certified to be capable of killing a wide range of germs and bacteria. It can also get rid of different kinds of common viruses, such as the influenza virus, hepatitis B virus, herpes simplex virus, and more.

Suji Siv, a representative for Clean Group Manly, says, ?We use advanced and high-quality cleaning equipment and methods to ensure a healthier, long-lasting cleaning at your place. These include HEPA multi-filtration vacuum cleaning for improving indoor air quality, hospital-grade germicide disinfectant cleaning to remove disease-causing germs, among others.?

He continues, ?We know that each business is unique and the cleaning requirements of your business may not be the same as the business down the street. We offer flexible cleaning plans that are client-specific and built around the needs of your business. Our goal is to ensure that we provide a clean and healthy environment for your business.?

The office cleaners from Clean Group Manly also use high-quality microfiber cloths. These are used for dusting and cleaning various places in the office, like lightboards, window sills, furniture, and more. The antibacterial microfiber cloths can be used to eliminate allergens and up to 99 per cent of bacteria from surfaces.

They also utilise advanced and certified cleaning mops that are made up of antibacterial microfiber. These mops are designed to stop bacterial growth and to efficiently clean the floors and surfaces so that 99 per cent of the germs, dust, dirt, and bacteria are removed.

For coronavirus sanitising cleaning services, they first perform their basic cleaning services. This is followed by disinfection and sanitising services. Their expert cleaners will sanitise all of the items, equipment, and furniture that often touched by people. These include door handles, lightboards, telephones, keyboards, railings, computer monitors, desks, bins, drawers, toilet seats, and more.

Suji Siv points out that there are a number of things that make their office cleaning services stand out among the crowd. First of all, their cleaners are highly and specifically trained in utilising highly effective cleaning solutions for dealing with viruses, using special cleaning agents, tools, and equipment.

Second, they ensure that they will always provide a thorough cleaning and sanitising for the novel coronavirus and other viruses. They will perform complete sanitising and sterilisation of all those crucial things found in the office to ensure that a safe environment is provided for the workers.

Third, their cleaners are equipped with the best coronavirus-proof hazmat suits, goggles, respiratory masks, and gloves to ensure safe and high-standard cleaning service. And finally, they ensure that they take all precautions and comply with standard cleaning safety measures to ensure protection for their cleaners while providing coronavirus sanitising services to customers.
