

# Drop N Bins Offers Online Dumpster Rentals Through Newly Launched Website

*November 18, 2020*

November 18, 2020 - PRESSADVANTAGE -

Drop N Bins, a company based in Waddell, AZ, has launched their new website, which allows them to offer easy and affordable online dumpster rentals. Customers can book a dumpster online at any time of the day or week, or they can simply give them a call. Aside from Waddell, they currently offer dumpster rentals to Buckeye, Surprise, Goodyear, Sun City, Sun City West, El Mirage, Peoria, Glendale, Avondale, Tolleson, Wittman, Youngtown, Phoenix, and all areas in between. They may also be able to serve even those outside of their service area although extra fees may be charged, depending on how far is the location outside of their service area.

Brad Thomason, a spokesperson for Drop N Bins, says, "We're happy to announce that we have a newly launched website where people can book dumpster rental online. Please check out our new website to choose the dumpster that you require."

A dumpster is a type of movable and transportable waste container, and the roll-off dumpsters available through Drop N Bins may be used for both residential and commercial waste removal projects. For homeowners, they offer a convenient way of getting rid of the junk resulting from a cleanup job, such as spring cleaning. Likewise, these dumpsters are useful for commercial projects, such as construction, which is known to produce large amounts of waste. It is convenient because it saves customers several trips to the waste disposal site or recycling facility.

The roll-off dumpster is an open top dumpster and has a rectangular footprint. This waste container is designed to be transported using special roll-off trucks. These dumpsters are delivered to the customer's specified location and the customer simply puts the junk or waste inside the dumpster. On the scheduled date of pickup, Drop N Bins will send a truck to pick it up and transport the waste to a landfill or recycling facility.

They currently offer three sizes of roll-off dumpsters. The 10 yard dumpster has a capacity equivalent to 4

pickup truck loads. It is suitable for relatively small projects, such as debris removal, landscaping projects, garage and attic cleanouts, and more.

The 15 yard dumpster has a capacity that is equivalent to 6 pickup truck loads. It is often used for bathroom remodeling projects, small furniture removal, junk removal, and more.

The 20 yard dumpster has a capacity that is equivalent to 8 pickup truck loads. It is usually rented for both commercial and residential use and it is suitable for construction site cleanups, yard projects, roofing projects, and more.

Meanwhile, customers will need follow a number of suggestions when renting a dumpster for waste or junk removal, whether it is a major home remodeling project or a total attic or basement cleanup. First of all, it is essential to prepare a particular place for putting the rental dumpster. They are quite large and it is important to specify a particular area for the container and keep it free of obstacles, such as toys, equipment, and other things that impede access to the container.

Second, it is important to choose the appropriate size for the dumpster. Sometimes it may be difficult to estimate the proper size. In general, it is advisable to choose a container that is bigger than what is required to help avoid overage charges or the expense of asking for a second container later on. Usually, a 10-yard dumpster is suitable for a kitchen/ bathroom replacement or a small garage cleanup. For construction and commercial uses, a 40-yard dumpster is usually appropriate.

Third, it is important to check the policy on prohibited items, such as batteries, flammable materials, oil, paint, tires, Freon, and more. To ensure that there would be no problem later on, it is advisable to inform Drop N Bins about the materials that the customer plans to put in the container. It should be noted that there are prohibited items because these materials are usually not accepted in landfills or waste disposal facilities.

People who would like to learn more about residential or commercial dumpster rentals in Waddell and neighboring areas may want to check out the Drop N Bins website at <https://www.dropnbins.com/>, or contact through the telephone or via email.
