

Orland Park Options Medical Weight Loss Gets a New Website

November 21, 2020

November 21, 2020 - PRESSADVANTAGE -

Options Medical Weight Loss, based in Orland Park, Illinois, has announced that they have recently obtained a new website. The new site is designed to make it easy for residents of Orland Park and neighboring areas, such as Tinley Park, Palos Hills, Homer Glen, Lemont, Frankfurt, Mokena, and Oak Forest, to find a medical weight loss clinic for a safe and effective weight loss program. The new website design makes the site mobile friendly, makes it easier to navigate, and more user friendly.

The Orland Park Options Medical Weight Loss clinic offers a medically supervised and personalized weight loss program. This is because they understand that each weight loss patient is a unique individual and the weight loss plan must fit each person's own lifestyle. The medically supervised weight loss programs include a modification of the successful ketogenic diet and the hCG diet. To aid in the weight loss efforts, prescription medications and appetite suppressants may be provided. These include: phentermine for weight loss; phendimetrazine; diethylpropion; non-prescription programs; hCG injections to pair with the hCG diet; lipotropic fat burning injections; and B12 injections.

Whatever the weight loss diet plan that is preferred by the patient, an in-house counselor will help in choosing

the best fit for the patient, with regards to his or her lifestyle. Those who have already experienced their weight loss program have had positive things to say about it. In fact, in both Yelp and Google, Options Medical Weight Loss has a perfect overall rating of 5 stars.

For instance, Carmen R. gave them five stars on Yelp and said, "This business is very professional and always answered all my questions. I've been going here since May 2020 started with the weight of 186.5 and as of July 27, 2020, I am down to 175.5. As of 7/27/2020 I have lost 10 lbs. I have been unable to exercise due to a knee injury. But overall, I think I'm doing good. I've been trying to eat healthier. I will continue to go here until I go to my weight of 160.0. I have been released from my doctor he can start my exercising this week so hopefully I will lose it faster. I also have to keep in mind that I'm 69 years old and it's probably gonna be a little harder for me. But everyone here is just so terrific and so supportive. Kudos to all!?"

The Options Diet System of Options Medical Weight Loss has four phases. It is considered to be suitable for people who: desire weight loss guidance and structure, using FDA-approved appetite suppressants; prefer to boost their metabolism and their immune system; and want lifestyle changes that can be maintained for the rest of their life.

During the first phase, the patient is introduced to a modified ketogenic diet plan. The principle is that once the body gets into a state known as ketosis where the amount of carbohydrates is not enough to fuel the body, the body will use stored fat as fuel. And during the next phase, glycemic foods are introduced into the diet but making sure that fat intake is very limited. The purpose of this phase is to get the body used to regular amounts of healthy foods.

During the third phase, the patient is introduced to healthier carbohydrates, while ensuring that weight loss is maintained. If during the first phase, it is noticed that the body weight has attained a level of stability, the medical weight loss doctor will assist the patient in the gradual reintroduction of some carbohydrates into the diet, while carefully observing the body weight. The last phase is where the patient has already achieved the desired body weight and will now focus on maintaining it.

It should be noted that during the different phases, the patient may opt for the prescription program where weight loss medications and FDA-approved appetite suppressants may be prescribed by the doctor to help in the weight loss.

Those who are interested in knowing more about the weight loss programs or want to schedule a free consultation may want to visit the Options Medical Weight Loss ? Orland Park website, or contact them through the telephone, or via email.
