Auto Accident Chiropractor Now Seeing New Patients

November 24, 2020

November 24, 2020 -
Jefferson Spine and Injury Center, a chiropractic clinic based in Arlington, Virginia, is encouraging patients with auto accident injuries such as whiplash, neck pain, back pain, shoulder pain and herniated discs to get in touch immediately. The clinic utilizes the latest and most technologically advanced techniques in chiropractic treatment, massage therapy and physical rehabilitation to ensure long-term results for patients in Arlington and the surrounding areas.

Dr. Leslie Holcombe DC, founder of Jefferson Spine & Injury Center, says, ?Being a victim in an automobile accident is a serious matter. In addition to any visible injuries you may have, you might also be suffering from any number of soft tissue injuries that are difficult to diagnose because they do not show up on an X-ray. If you leave such issues untreated, you?ll find that you suddenly develop one health issue or another anywhere between days to months after the accident. This means you need to have a professional both diagnose your condition and treat it as soon as possible. That?s where a chiropractor comes in.?

The doctor adds, ?A good chiropractor can help you to fully recover from any soft tissue injury you may be suffering as a result of your accident. We are able to properly diagnose, document and treat you in a manner that most benefits you. We coordinate with other medical specialists, such as neurologists, orthopedic surgeons, pain management doctors and neurosurgeons, taking a holistic approach to your health and wellbeing.?

What sets Jefferson Spine & Injury Center apart from other chiropractic clinics in Virginia is the fact that they accept all third party claims. That means that the clinic can offer no-cost, no-hassle auto injury care to everyone who needs it and will directly bill the at-fault party's insurance company for the victim. This way, the patients can focus entirely on their treatment and getting back to 100% health.

The clinic also points out that getting immediate medical care can also help facilitate any settlements the victim is due. Given that people in pain are expected to seek immediate treatment, the lack of such an action

can cause settlements to fail, even when the car accident victim is in fact suffering greatly.

With many years of chiropractic experience behind them, Dr. Holcombe is an expert in the proper treatment and documentation of soft tissue injuries resulting from auto accidents. She has extensive post-graduate continuing education studies in auto collision injury research and physiotherapy/rehabilitation treatments and techniques. After gaining a Bachelor's Degree in chemistry from Morgan State University (cum laude), she worked in the biomedical research field for many years and had planned to attend medical school until she visited a chiropractor to deal with pain in her neck and back (caused by an auto accident) and was inspired to pursue chiropractic instead. She graduated cum laude from Life Chiropractic College in Marietta, Georgia in 1997 to become a Doctor of Chiropractic and has been helping auto accident victims ever since.

Dr. Holcomne?s expertise and care has earned the clinic the trust of their patients, and Jefferson Spine & Injury Center boasts a near perfect rating on their Google profile. A recent review heaps praise on the auto accident chiropractor, saying, ?This is one of the best chiropractors I've been to. Dr. Holcombe is a great doctor, she listens to your pain and needs. Mike, the massage therapist, hands down is the best. Everyone at this office is outstanding, and I'm thankful to have met everyone here who provided care. If you have any PT needs, this is definitely the place to go.?

Meanwhile, another review says, ?Coming to Jefferson Spine & Injury Center was the best decision I could have made after my car accident. After being turned away from a doctor that minimized my neck and back pain, Dr. Holcombe was attentive and confirmed I had injuries. She began treatment right away, and I always left the office feeling much better than when I came in. Dr. Holcombe?s staff is also very welcoming and professional. All around, treatment has been a positive experience, and I recommend this center for anyone who?s looking to treat their auto accident injuries.?
