

Company Offering Lawn Care Near Me in Chesapeake Launches New Website

December 16, 2020

December 16, 2020 - PRESSADVANTAGE -

Lenard's Lawn Care Service, a company offering lawn care in Chesapeake, VA, and neighboring areas, is proud to announce the launch of their new website. The move had the purpose of updating their website to reflect the expansion of their services, including weed control, fertilization, and aeration. They will continue to provide mowing services. The new website can be accessed at <https://lenardslawncareservice.com/>.

Mike Lenard, Owner and President of Lenard's Lawn Care Service has a decade of experience in ground maintenance. He points out that he enjoys working with customers to make their lawn among the best in the neighborhood. Lenard's Lawn Care Service is a veteran-owned company that offers lawn care and commercial snow plowing services in Chesapeake, Suffolk, and Virginia Beach.

Mike Lenard says, "We are a quality, not quantity driven company. We want your lawn to be the best in the neighborhood, and we are not in a rush to get to the next lawn. Our normal scheduling only has enough lawns to have the teamwork eight hours a day. Our team leaders have at least 5 years of experience in the lawn maintenance field. We only hire the best of the best because I know the kid next door, and anyone with a truck and a lawnmower can be in the lawn care business and do it cheaper than we can. Our goal is not to be cheaper than everyone else, but to be better professionals."

He continues, "If you have concerns about your lawn or if you need regular lawn maintenance, don't hesitate to call us. Or you may want to visit our headquarters and take a look at what we can provide, including our equipment."

Lenard's Lawn Care Service provides several services. These include lawn mowing, lawn care, lawn maintenance, lawn aeration, lawn seeding, lawn fertilization and weed control, mulch services, and commercial snow plowing.

Lawn care services including mowing, edging, fertilization, edging, weed control, and spring and fall clean up. It should be noted that while practically anyone can do lawn mowing, there is a correct way of doing it. If it is

not done properly, the lawn will have some difficulties in surviving. Mowing should also be properly timed to ensure that the grass will grow healthy and thick enough to minimize weeds' growth.

Meanwhile, lawn edging is vital in getting a clean line for the lawn that adds to its aesthetic value. This enhances the home's curb appeal. Various techniques may be used, which professional lawn care service providers have the expertise and experience to do correctly.

The primary idea behind lawn aeration is to allow the lawn and the soil below the grass to breathe. The growth of lawn thatches and the compaction of soil make it difficult for the soil to breathe. Aeration is done by poking holes in the soil in a number of places. But if this procedure is insufficient, core aeration may need to be done. This involves the removal of lawn thatches by raking deeply. Lawn aeration aims to break up compacted soil to allow water and fertilizer to reach the roots. It is important to note that those parts of the lawn with heavy foot traffic will need more frequent lawn aeration.

Lawn fertilization is necessary to ensure that the lawn grass will remain green and healthy. The common problem with homeowners is that they don't know which fertilizers to use. It may be a good idea to have professionals do the fertilization to ensure that the right products are used and done properly.

Weed control for lawns is essential because weeds may invade because of poor maintenance practices, including soil compaction. Thus, an integrated weed management program may be required to control most weed populations.

Those who want to know more about lawn care services offered may want to check out the Lenard's Lawn Care Service website or contact them through the telephone or via email. Their hours of operation are from 8:00 am to 4:00 pm, from Monday to Friday. To know more about the company, people may also want to check out their BBB page.
