

CM Counsel Plymouth Meeting Now Offering Medicinal Marijuana Evaluations

December 19, 2020

December 19, 2020 - PRESSADVANTAGE -

The Plymouth Meeting location of CM Counsel wants people in and around the Montgomery County area of Pennsylvania to know that they are now offering medicinal marijuana evaluations. This is part of the broad spectrum of emotional well-being services that this reputable counseling center has been offering for many years. Their specialized treatments are intended to help everyone from children to older adults as well as families and couples in crisis.

Rachel Bennett, a spokesperson for CM Counsel, pointed out that medical marijuana has been approved for use in the state of Pennsylvania since April 6, 2016, when Governor Tom Wolf signed the bill into law. This bill, known as Senate Bill 3, allows marijuana use to treat certain medical conditions. She added that despite the fact the law had passed, it was not until February 2018 that the first highly regulated dispensaries opened to provide medical marijuana for those patients who have been granted a license (similar to a prescription) to purchase it. Some of the conditions that medical marijuana is authorized to treat in Pennsylvania directly relate to CM Counsel's areas of expertise, including anxiety disorder, post-traumatic stress disorder, and sleep disorders.

Bennett stated that the medical marijuana evaluations conducted at their Plymouth Meeting office fall under the responsibilities of their medical staff who handle their Psychiatric Evaluation & Medication Management services. At CM Counsel they are very aware that a large majority of the population in America seek out mental health counseling at one time or another and those who never do are often the ones who need it the most. Their medical marijuana evaluations are all performed by licensed medical doctors and nurse practitioners who are specialists in the realm of diagnosing and treating behavioral health problems.

In addition to medical marijuana evaluations, CM Counsel also offers a variety of other therapeutic services. This includes being one of the area's best practices when it comes to child & adolescent evidence-based therapies. These specialized treatments help young patients deal with such common issues as failure to cope, dysfunctional behavior, problem-solving, and mood disorders. Those who have experienced CM Counsel's individual therapies for adults also highly rate the services they have received. She says that during these one-on-one sessions, an individual seeking help will meet with a psychologist, licensed clinical social worker, or licensed professional counselor to discuss any issues that are impacting their quality of life. CM Counsel also provides family and marriage & couples therapy.

CM Counsel has two additional Philadelphia-area locations: 210 Mall Boulevard, Suite 204 in King of Prussia and 740 Springdale Drive, Suite 102, in the Whiteland Business Park in Exton. Bennett says that all three of their locations offer very similar services, so clients should choose the location most convenient for them.
