

Mike's Auto Glass Tampa Adds Re-Calibration Service After Auto Windshield Repair

December 09, 2020

December 09, 2020 - PRESSADVANTAGE -

A local Tampa, FL auto glass company, Mike's Auto Glass Tampa, announced they have added re-calibration service after any windshield repair or replacement service on vehicles. Many ADAS (Advanced Driver Assistance Systems) sensors are placed either on or near windshields. Their proper functioning and, therefore, driver's safety depends on their correct position relative to the windshield. If the windshield is replaced the ADAS sensors have to be re-calibrated to assure the ADAS system is functioning correctly, according to the manufacturers' specifications. As a provider of auto glass repair and auto glass replacement, Mike's Auto Glass Tampa is now offering this service to ensure the safety of their customer's vehicle.

The ADAS calibration service assists drivers in driving as well as parking functions to increase car and road safety. This is done through sensors installed after windshield repair or installation that detect nearby obstacles or driver errors and respond accordingly. Through a safe human-machine interface, ADAS increases safety. Mike's Auto Repair Tampa is now offering this service as a new way for customers to increase driving safety while their vehicle is already being serviced.

For more information about the company, those interested can visit the company's website here: <https://mikesautoglasstampabay.com>.

"Since Mike's Auto Glass Tampa does windshield replacement, the ADAS calibration service done right after the replacement in the same shop saves customers' time and money, complies with insurance, and assures proper functioning of the ADAS system of safety." says Justin Faltus, Company Representative at Mike's Auto Repair Tampa.

Features and benefits of the ADAS re-calibration service after auto windshield repair include improving roadway safety through features such as adaptive cruise control, lane departure warning, collision warning, and eliminating blind spots; it saves time and money by service being provided at the same time as customer's vehicle is already in the shop for windshield service; and it is compliant with insurance companies, ensuring maximum savings for customers.

After car windshield repair or replacement, the addition of this service is a great way for drivers to have confidence in their road safety while already receiving top quality service and products for their vehicle.

Mike's Auto Glass Tampa, established in 1989, has become the preferred choice in auto glass needs for many auto owners in Tampa, FL. The company specializes in auto glass services for exotic, high-end, and luxury vehicles. Mike's Auto Glass services high-end models such as Mercedes, Jaguar, Austin Martin, Porsche, Lotus, Maserati, Ferrari, Lamborghini, and more. The company focuses on high-quality replacement parts best suited for each vehicle's needs. All services and repairs are offered according to industry standards and at affordable pricing.

Providing clients with top quality service and high-end parts, Mike's Auto Glass Tampa positioned itself as a one-stop solution when it comes to auto windshield repair and replacement. The company prides itself on going above and beyond to ensure customer satisfaction. The addition of the ADAS re-calibration service after windshield repair is yet another reason why Mike's Auto Glass Tampa is a trusted provider of safety and excellence for many.
