

Central Texas Spine Institute Helps Patients Take Their Lives Back With Back Surgery

December 14, 2020

December 14, 2020 -
Austin, Texas based Central Texas Spine Institute PLLC, which ranks among the best spine centers in the United States, is pleased to share that they can help many patients regain control of their lives via back surgery. The private medical practice offers comprehensive spine care, including diagnostic services, conservative treatment modalities and non-invasive back pain therapies as well as a host of other services.

Headed by the award-winning spine surgeon Dr. Randall F. Dryer, Central Texas Spine Institute offers a number of back surgery services for patients who have severe back issues that need surgical treatment. The procedures they undertake include endoscopic discectomy, lumbar fusion, artificial disc replacement, cervical discectomy, spinal reconstructions, minimally invasive spine surgery and so on.

Dr. Dryer says, ?I can say without any doubt that living with a bad back is a painful and agonizing thing, and there is sometimes no easy way to treat your bad back. There are just some situations where conservative care and treatment simply don?t work. Medications, injections and physical therapy can all work wonders in

some cases, but if your back issues are severe, you need back surgery. In Texas, you won?t find a better place to have it done than Central Texas Spine Institute. My team of experienced physicians and physical therapists are dedicated to helping people who are dealing with all kinds of back issues, and we are sure that we can help you too.?

He continues, ?If you have any kind of back pain, it is important that you check it out as soon as you can. Severe back issues can lead to further problems down the road, and you obviously don?t want that, not to mention the fact that living with back pain is constant, agonizing pain. Acting early can also mean that you can completely avoid any need for invasive procedures and correct whatever is happening with simple, straightforward treatments. However, if things have gotten to the point where you do need surgery, we can assure you that you?ll be in the right hands with us.?

Dr. Randall F. Dryer is a renowned doctor and a respected innovator in stem cell therapies. His extensive work has been published in peer-reviewed journals, and he has earned numerous awards. He has the honor of being named among the top 100 surgeons in the US by Becker's Spine.

Central Texas Spine Institute PLLC has earned a lot of praise from their patients due to their dedication to providing high quality treatments. On their GMB listing, they have a rating of 4.5 out of 5 Stars (from over 200 reviews). Kimberly Lee says in her 5-Star review, ?Wow! Dr. Dryer, Vanessa, Lynn and the girls up front treated me with tremendous respect. Long story short, I had a two level fusion two weeks ago. I am now walking my dog again and playing ball with her. I couldn?t do that before Dr. Dryer performed his magic. I highly recommend Dr. Dryer. Only place to go if you want the greatest care and knowledge.?

Meanwhile, in another review, Majdi Khammash says, ?I was referred to Dr. Dryer by a coworker. I went to see him after I had a negative experience with a different surgeon. During my first visit with Dr. Dryer, he reviewed my X-rays and MRIs, and he immediately identified the issues and recommended a very difficult surgery. 10 days later, I had the surgery, and I?ve had nothing but positive results. I had a lumbar fusion on 2 levels, and 6 weeks later, I have no back or leg pain. I?ve been to his office since the surgery twice, and I?ve had nothing but positive experiences with him, his PA and his staff. I highly recommend him. All I can say is he is very compassionate, caring and good at his job.?

Those who want to learn more about Central Texas Spine Institute PLLC and their services are welcome to visit the clinic?s website to explore further.
