Frisco Locals Promote "Love Frisco, Shop Frisco" Campaign To Support Areas Small Businesses

December 23, 2020

December 23, 2020 -
Frisco, Texas community bloggers are posting about about a "Shop Local" campaign called "Love Frisco, Shop Frisco". The focus of the campaign is to help businesses which were affected by the COVID-19 pandemic.

The relaunch of the ?Love Frisco, Shop Frisco? campaign for this winter is intended to help support local businesses, according to a Summit Daily article published on November 25th. In it, they say that, ?Officials are revamping the Love Frisco, Shop Frisco campaign this winter to help support local businesses impacted by the COVID-19 pandemic. The campaign has relaunched under the title ?Love Frisco, Winter Frisco,? allowing community members to purchase gift cards usable at participating stores and restaurants in town as well as receive a bonus card as an extra incentive to shop locally this holiday season.?

The program takes the structure of a summer e-gift card program, the remaining funds of which were used for this winter program (according to an account published by CBS 4 on November 23rd). In the words of CBS 4, ?After your purchase, the town will match it with a 33% bonus gift card and cover all e-gift card fees. The maximum match for this deal is $125 in bonus gift cards.? If one is looking to do some shopping for Christmas with a little bit of a charitable component, this event would be ideal, according to the local orthodontist.

The clinic, mBrace Frisco Orthodontics, itself a Frisco small business, is run by Dr. Shireen Irani and her dedicated team. The clinic specializes in braces and other orthodontic appliances. These may be recommended by a specialist to enhance the orofacial appearance of a patient through the improvement of the growth and development of the jaws. In most cases, orthodontic treatment may be utilized to correct issues like underbites or overbites, crooked or crowded teeth and incorrect jaw positions. It is important that such issues should not be left untreated as they can result in severe problems tooth decay, gum disease, chewing or biting issues, earaches, headaches and even difficulty speaking.

In applying the latest techniques in orthodontics, mBrace Frisco Orthodontics offers various kinds of braces.

The available options include metal braces, WildSmiles braces, clear (ceramic) braces, and Invisalign. Metal braces have been used for more than a century to straighten teeth, but the modern ones are more discreet, smaller and more comfortable. It is now even possible to choose from a wide array of colors for braces, allowing patients to add their own personal style to their braces.

WildSmiles Braces allow patients to choose from a wide range of fun shapes, including hearts, stars, flowers, football, sports balls and super-diamonds for their front teeth. Ceramic braces are more suitable for those who want their braces to be hardly noticeable. Invisalign makes use of a series of clear trays, which are known as aligners and are created through computer simulation. Dr. Shireen makes use of the virtual model of a patient?s teeth to design a series of trays for that particular patient. These series of trays are designed to gradually shift teeth into the correct position while ensuring minimum discomfort.

Among other announcements, the clinic is pleased to remind the local community that they offer a free consultation for first time customers. Due to the health and safety restrictions in place due to the COVID-19 pandemic, mBrace Frisco Orthodontics has been utilizing technology for virtual visits to keep people safe and healthy. For these virtual appointments, patients are encouraged to take photos of their teeth. Instructions are also provided on how to take these photos. The patient will then send the photos to the clinic via email or text. Dr. Shireen will review the photos, and a team member will later get in touch with the patient to provide instructions on the next steps to take.

The clinic has an excellent reputation, as seen in their many patient reviews. In a 5-Star rated Google review, Amy Hill states that, ?My daughter is starting her journey with orthodontics. We looked into a few options in our area and found mBrace to be a very practical and affordable solution for us. So far, my daughter is doing well and adjusting/settling in for the long haul. Staff have kept us up to date on the things to know and even checked in by text message making sure she was doing great with her new gear. Very personable and care about their patients.?

To learn more about mBrace Frisco Orthodontics and the services they offer, one may visit the clinic?s official website. They can also be contacted directly via phone or email.
