# Hard Drive Recovery Associates Publishes Article On Podcast Tech

*January 28, 2021*

January 28, 2021 -
Irvine, California-based Hard Drive Recovery Associates (HDRA) recently published a new article titled ?Do You Have the Tech Basics of Podcasting.? Running a podcast, while an apparently simple endeavor, is a hobby that requires a certain amount of commitment. Running a podcast also requires at least a basic understanding of the technology used to produce content. Many people have begun looking for hobbies during this pandemic, taking up hobbies and activities to stay occupied, and podcasting is one of the many ways in which people have chosen to spend their time and energy. A podcast allows one to share things with the world, and Hard Drive Recovery Associates wants to make sure that everyone knows how to go about setting up their own podcast as well as keeping it running.

?There has been a surge in the amount of content people publish,? says the article. ?Whether it is to bring some semblance of normality in their lives or to remind others in their network what they?ve been up to in these boring times, sharing podcasts can be quite therapeutic and effective as a social activity these days.?

In order to stream a podcast, one needs an internet connection and a computer, along with a few other items. The first on this list is a microphone, which is used to actually record the podcast, and there are a wide

variety of microphones available on the market. These products range from high-end devices to more affordable options. A high end microphone is not an absolute requirement (although it can boost the audio quality of one?s podcast). A basic microphone can do the job just as well, however, and a lot of podcasts simply use the most basic setup to produce content.

Another item one might need is a headset, especially for a podcast with multiple participants. ?A headset is a must if you are going to have a podcast with multiple participants,? the article says. ?If you are doing a solo act podcast or if you?re not doing a reaction vlog or content that would require you to watch or listen to another person or piece of content, then a headset may not be necessary. But if you have a partner or you?re doing a reaction podcast, then make sure you have a great headset.?

Lastly, recording and mixing software are a necessity for anyone looking to put together a podcast, according to the article. Podcasts featuring just one unedited voice do fine but adding other elements requires special software. Programs like Digital Audio Workstation, for example, are among the powerful tools used by many people to produce quality audio.

HDRA is a data recovery service which specializes in helping both individuals and businesses access data that they may have lost somehow. Over the past 15 years, the company has worked on almost every data loss scenario imaginable, from major fires and damaging floods to damaged computers and hard drive malfunctions. The company has successfully found solutions to almost every data loss issue they have faced over the past decade and a half and is confident in the ability of their technicians to recover lost data in almost any situation.

The data recovery service regularly receives excellent reviews from clients. One Google review from a client named Leticia states, ?I called Hard Drive Recovery Associates after my son accidentally nudged my laptop off the table, making it pretty much useless. Unfortunately, I had tons of baby pictures and other super important memories, and I wasn't willing to give them up! Louis was my data recovery engineer, and I am eternally grateful for his help during what was a pretty scary time. I'm not sure that laptop data recovery could be any easier than this! Would definitely recommend them!?

Another happy client, Reynaldo, says, ?I really had no idea that SSD data recovery was even a thing, but I was lucky to have found Hard Drive Recovery Associates. Louis was very helpful, and walked me through the data recovery process quickly and easily. The whole thing was finished really quickly, and the price was just right. Thanks again!?
