

## **Acacia Dental Group Offers Effective Teeth Whitening To Canberra Residents**

*December 21, 2020*

December 21, 2020 - PRESSADVANTAGE -

Woden, ACT-based Acacia Dental Group is pleased to offer the best teeth whitening treatments in the region to Canberra residents. Given that this year's pandemic restrictions may have caused some members of the public to forego their dental health due to stress or other factors, the clinic encourages their community to pursue all options to regain their glowing smiles.

Since they first opened their doors, the clinic has made it a point to support their community's dental health via treatment as well as by encouraging adequate self-care. However, the team at Acacia Dental also acknowledges that some may find it quite difficult to attain the perfect smile they are looking for, even if they currently have an excellent routine to protect their dental hygiene. Fortunately for people in this situation, the clinic provides a highly effective teeth whitening solution that is virtually guaranteed to brighten up any smile.

The procedure in question is known as the Philips Zoom Whitespeed In-chair (or in-office) whitening treatment, which Acacia Dental claims can whiten teeth by a full eight shades. Its efficacy and ease of implementation is also why many experts in the field consider it to be a patient's best option for teeth whitening. Learn more at the following link: [Teeth Whitening Canberra](#).

The Philips Zoom Whitespeed In-chair utilizes a two-pronged approach to ensure great results, combining a finely-tuned LED light source with a gel to induce a whitening effect in the patient's teeth. According to the clinic, this procedure has also proven quite popular among patients due to how quickly and painlessly it can be implemented. It only takes around 45 minutes to complete, especially since the LED also helps to improve the whitening function, making it take root much faster than otherwise possible. The community will also be pleased to learn that this technique has been thoroughly tested to clinical standards. Should they have any concerns, however, Dr. Sirisha Yalamanchili of Acacia Dental Group will be happy to settle any misgivings during the initial consultation.

One of the main advantages of this short treatment period is that many patients will be able to fit an appointment into a normal day. They can also expect to avoid having to take time off work in order to recover. Acacia Dental's team takes each patient's unique needs into account when they develop a plan for any treatment, and the Philips Zoom Whitespeed In-chair is no different. Patients are always able to have a frank discussion with their dentist regarding their goals and how much pain they are able to tolerate (or share any other health concerns that may be relevant), and this is true for all their cosmetic procedures as well.

Furthermore, the clinic is cognizant of the fact that many will want to be more careful with their budgets given the difficulties they have faced this past year. Fortunately, every service at Acacia Dental Group is competitively priced, and the Philips Zoom Whitespeed In-chair currently offers patients savings of up to \$530. Notably, they will also get a free take-home whitening kit upon completion. Patients have the option of gifting this kit, worth \$250, to a friend or family member if they so wish. This is largely due to the fact that the Philips Zoom Whitespeed In-chair is expected to last for up to three years, especially if they practice good oral hygiene during this period (no additional or special measures are necessary). This kit has two additional benefits that the community should be aware of as well: it is stronger than other kits that can be purchased through any source other than a licensed dental provider and is also more effective than over-the-counter variants.

Those looking for the best teeth whitening in Canberra are welcome to reach out to Acacia Dental Group for further details. Additional information regarding the Philips Zoom Whitespeed In-chair treatment as well as the clinic's numerous other services can also be found on their official website. On the other hand, patients may connect with the practice through their preferred social media platforms to stay abreast of their latest offers and announcements.
