

Natural Sunless Tanning Products Launched

September 16, 2015

September 16, 2015 - PRESSADVANTAGE -

Unreal Sunless, a business based in Wells, Somerset, United Kingdom, is now offering a wide range of natural sunless tanning products. As can be seen on <http://unrealfaketan.com>, these products are made up of nourishing, skin firming ingredients, which means that they will not harm the skin in any way.

"Many fake tan products contain huge amounts of chemicals, including parabens, alcohol, artificial fragrances and DMDM," says Liz Hawthorne from Unreal Sunless. "All of these chemicals are harmful to the body and the environment. People often feel they can use it safely because they put it on the skin, rather than ingesting it. However, the skin actually absorbs all these nasty chemicals and sends them to various parts of the body. Our products are completely natural and therefore do not cause damage to either the body or the planet as a whole."

Unreal Sunless products are vegan approved. The method of creating the self tan product is such that it has little to no smell. This is in stark contrast to other self tan products, which often smell for a number of days. Additionally, moisturizing agents have been added to the product for further benefit to the skin. One such ingredient is hyaluronic acid, which is known to be one of the best natural moisturizers available.

The product also contains jojoba oil and hibiscus flower extract. These ingredients have been shown to help

protect the skin from UV damage, encourage further collagen growth, and even provide the body with antioxidants. Antioxidants fight free radical damage, which has the potential to cause cancer.

These products have also been positively reviewed. "These are by far the best tanning solution products I have used!" says Emma Ireland. "I had the privilege of Liz coming to train me herself and I had a great day learning all about the Unreal products. Liz made the training fun while explaining all I needed to know. I have used other products before but the results of these are fab! No sticky feeling, very quick drying, lovely natural glow and lasts over a week with no patchy appearance as it has faded! I am enjoying using the products on my clients."
