Wisdom Teeth Removal & Other Procedures Available At Reason 2 Smile Dental

December 28, 2020

December 28, 2020 -
Salt Lake City, UT-based Reason 2 Smile Dental is reaching out to encourage their community to keep their oral health in mind as the country waits for the end of the pandemic. The practice, which offers wisdom teeth removal, restorative care and other forms of general dentistry, has taken several steps to ensure the safety of both their staff and patients over the course of this year. As such, the dental office is still one of the safest places where one can have their teeth checked by a professional. Learn more at the following link: https://reason-2-smile-dental.business.site/#service.

Dr. Andrew M. Vernon of Reason 2 Smile Dental states, ?It can be easy to forget that our mouths still need to be cared for while our lives are overshadowed by a global crisis. However, we still need to keep an eye on our dental hygiene and the state of our teeth. Since Reason 2 Smile Dental came to this realization early this year, we have had a lot of time to restructure our procedures to ensure the safety of all parties involved. This means you do not have to make the choice to ignore pressing issues with your teeth. We have taken every measure possible to keep you safe when you arrive to receive the treatment you need.?

The family dental practice understands that safety is their patients? highest priority. While many may believe

that they should stay at home and minimize personal contact ? perhaps at the expense of their dental health ? Reason 2 Smile Dental highlights the fact that dental issues can still take the form of unavoidable emergencies.

?Pain alone can lead you to seek help,? observes Dr. Vernon, ?and you will not be able to ?wait it out? if your wisdom teeth start giving you trouble, for instance. Some patients may also need an emergency root canal, and this is when they should reach out to a dentist in their area as soon as possible. However, many of the issues you can experience with your teeth are actually avoidable with a little preventative care. At Reason 2 Smile Dental, we want to ensure that you feel safe and comfortable seeking out the kind of professional care you deserve well before the situation evolves into an emergency that both hurts and costs more. However minor your toothache feels today, it could get worse tomorrow, so we urge you to get in touch with us at once.? Learn more here: https://g.page/Dr-Andrew-Vernon-Dental.

Impacted wisdom teeth, the dentist says, can occur when wisdom teeth (also known as third molars) do not have enough room to emerge from the gums and develop naturally. A person afflicted by this condition may find it more difficult to clean their teeth (which in turn leads to gum infections, tooth decay or gum disease if not remedied). The patient may even suffer oral misalignment, opening the door to other problems.

Fortunately, Dr. Vernon shares that there are distinct signs that patients may use to gauge whether they need professional medical help. This includes red or swollen gums, pain in the jaw (perhaps while chewing), a sense of pressure or pain in the back of the mouth and so on. Bad breath is also a known symptom. In any case, the practice urges their community not to hesitate to get in touch if they suspect a problem with their wisdom teeth.

The staff at Reason 2 Smile Dental also offer pediatric dentistry to their community, and this is one of the reasons they have made safety their utmost concern. The dental office strongly believes in helping children understand how important it is to care for their teeth from a young age, and they go out of their way to be welcoming and understanding of all their patients. Given that many children have a fear of the dentist, Reason 2 Smile Dental?s friendly staff always do everything in their power to set young patients at ease. Since the whole family can have their teeth examined under one roof, this has the added bonus of giving every family the opportunity to enjoy comfortable, simple and stress-free trips to the dentist where children as well as the adults are looked after.

A 5-Star Google review from Ivanka Kostial helps illustrate why Dr. Vernon and his staff are so popular among their community. An excerpt from the review says, ?Dr. Vernon is not only skilled and experienced but also incredibly patient and thorough. He will explain your options in detail and help you make educated choices without ever making you feel rushed. Just had a root canal done by him and I hardly felt a thing. What an incredible job with the numbing! Unreal.?

The review later adds, ?They might have even cured my long standing dental phobia, along with my tooth problem. Top-notch pros. They will certainly be seeing more of me, and I will be recommending them to friends and family.?

Reason 2 Smile Dental primarily serves patients in Salt Lake City, but they welcome visitors from many of the surrounding towns and neighborhoods as well, including Mill Creek, Murray, Holladay, Zions Park, Woodside Heights, Winter Meadows, Arcadian Park, Smithfield and so on. Residents of these areas are welcome to contact the Reason 2 Smile Dental office if they wish to schedule an appointment for a dental check up, wisdom teeth removal and more.
