People Can Now Get Anonymous Hepatitis B Testing At Express STD Testing

December 21, 2020

December 21, 2020 -
Express STD Testing is now providing accurate Hepatitis B testing.

The process to test for hepatitis B has been simplified by Express STD Testing. People can now test without the worry of their results being exposed. The testing is accurate and private. The company is now offering hepatitis B testing at an affordable rate.

According to the website, ?Our hepatitis B test is approved by the FDA and checks for chronic and acute hepatitis B. This test screens for the antibodies created by the body to fight the infection. It is important to diagnose hepatitis B early to avoid liver complications. In case the results come back positive, there is a second test to confirm the rests. Our tests are highly accurate with a specificity rate of 99-100% and a sensitivity of 88%.?

They further explained what Hepatitis B is all about, ?In most cases, hepatitis B will not show any signs or symptoms. This means that there are people who might not be aware they are infected. If the symptoms appear they might include pain in the lower part of the abdomen, vomiting, nausea, loss of appetite, joint

pain, hives, fever, headache, and extreme fatigue. These will usually appear between six weeks and six months of infection. Hepatitis B infection is highly infectious and is spread though bodily fluids from an infected person. In most cases, the transmission is through intravenous drugs, shared drug injection equipment and sexual intercourse. Our experts recommend waiting for about 6 weeks of exposure to get tested for hepatitis B. If you suspect you have been exposed to the virus, you should include hepatitis B in your next STD checkup.?

For more information about hepatitis B testing, visit the Express STD Testing website.
