Winston Salem Roofing Company Explains How a New Roof Can Be Installed in the Winter Months

December 28, 2020

December 28, 2020 -
Grace Roofing And Construction LLC, a Winston Salem roofing company, has announced that they have recently published a blog post that explains if homeowners can have a new roof installed in the winter months in North Carolina. While there are a number of factors to consider and there are certain challenges, it is possible to have a new roof installed during winter, particularly when an experienced roofing contractor is called on to do the job. There may even be some advantages to having a new roof installed or have the roof replaced during winter, such as better availability due to less demand and lower costs because of lower prices of materials. Furthermore, certain roofing materials, such as metal roofing, can easily be installed even during the winter months without negatively affecting the quality of the roof.

Richard Sakowski, owner of Grace Roofing And Construction LLC, says, ?You don?t need to worry too much about having your roof installed or replaced during the winter months. Our roofing specialists are always checking the weather to see if factors, such as temperature decreases or heavy snow will affect a roofing project. And while some roofing materials may be sensitive to temperature, our roofing professionals are knowledgeable and experienced on how to overcome such obstacles when installing or replacing a roof. If you think you need a new roof or want to have your roof replaced, give us a call so that we can discuss the best way to proceed.?

Richard Sakowski also wants to stress that they are open 24/7, which means that homeowners and other property owners who are concerned about their roof or require emergency roofing services may be able to contact them at anytime of the day. In addition, they will not be charging additional fees for after hours or weekend calls requesting for Winston Salem roof replacement or repair services.

Grace Roofing And Construction LLC can provide various roofing services, including roof repairs, roof replacement, metal roofing, and commercial roofing. They recommend that homeowners consider roof maintenance to minimize the possibility of the roof getting damaged, especially during extreme weather. It is

important to have a reliable roof over the home and prevent leaks that can allow water to enter and cause further damage.

By having the roof inspected regularly, roof leaks due to various reasons may be prevented. Such leaks may be caused by clogged gutters, broken flashing, missing or damaged shingles, vent boots, holes, attic condensation, complex roof architecture, skylights, brick chimneys, or an aging roof.

The roofing professionals from Grace Roofing can provide roof leak detection services because many roof leaks are not easily noticed. Although some roof leaks may cause noticeable wet patches on the carpet or flooring, most will simply be stains on the ceilings or walls. Unfortunately, the problem with such roof leaks is that they may cause mold growth that may negatively affect the health of certain residents of the home, aside from causing damage to the home structure.

Meanwhile, the excellent quality of the roofing services provided by Grace Roofing And Construction LLC is attested to by the highly positive customer reviews they have been receiving. For instance, they have an overall rating of 4.9 out of 5 stars on Google. In a recent review, Carroll E. gave them a five-star rating and said, ?This company has a reputation for excellent, efficient, timely service and I can attest to that. Richard was courteous, pleasant & professional. I won't call anyone else. Thank you for providing such great service.?

Homeowners or property owners who require roofing services in Winston Salem and neighboring areas may want check out the Grace Roofing And Construction LLC website, or contact them on the phone or through email. They may be contacted 24 hours a day, at any day of the week. For information on their location and other important information, people may want to check out their Google Maps page at https://g.page/Graceroofingllc?we.
