

Roof.net Receives Five-Star Review from a Happy Client

December 29, 2020

Fairfax, Virginia - December 29, 2020 -
Roof.net, a roofing company based in Fairfax, VA, is proud to announce that they have received another five-star review from a happy and satisfied client. The customer was impressed with how Ken Briesemeister was able to provide customized solutions for the roofing problems encountered. The full review can be viewed here https://goo.gl/maps/U4ApTgUxWcY2fC7M9.

The customer who gave the recent five-star review, said, ?We couldn't be happier with Ken and his team. We were impressed with his problem solving when Ken customized solutions to our roof issues. Other companies claim to be client-oriented. However, our experience confirms that Ken is truly focused on making the client 100% satisfied, all at a reasonable price. In addition to personally supervising his crew and sending roof progress video clips, Ken always answered our questions and asked how we felt afterwards! Also, we liked that Ken let us benefit from his many years of roofing experience. Overall, we applaud Ken and his team. At all times, he was exceptionally responsive to our concerns/questions. If you want a new roof at a reasonable price with superior materials, outstanding workmanship, and a 15-year-transferrable warranty, hire Ken and

his team!?

Roof.net offers a range of roofing services in Fairfax and the surrounding areas. These include roof repair, roof replacement, roof inspection, and roof cleaning. Since the roof starts to age as soon as it has been installed, homeowners may want to have the roof inspected on a regular basis. This is to make sure that any hidden roof leaks are discovered as early as possible. Water getting in can compromise the home structure and cause damage to various parts including furniture and other belongings. Black mold may also grow and possibly cause health problems for certain members of the family. Meanwhile, Roof.net has videos of more positive reviews they have received that can be viewed here https://www.youtube.com/playlist?list=PLAW2_gEwtnuYyDzY09LD92xhFFeCknbTl.

The Roof.net roofing specialists will inspect the roof, including the attic, for any signs of leaks. Any missing or cracked shingles are quite easy to look for but problems involving the entry of water and excessive humidity due to insufficient airflow are much harder to detect. And while black mold, mildew, and rot may be easy to spot when full-blown, those that are just beginning to grow and multiply are more difficult to find. The roofing inspectors will also look for damp insulation because it is hazardous and may increase energy costs. To be able to detect water damage that is not yet noticeable by the naked eye, the roofing professionals use infrared moisture detection equipment.

Roof.net roofing professionals mainly use asphalt shingles as roofing materials, including timberline or architectural shingles, fiberglass asphalt shingles, laminate shingles, and three-tab shingles. They offer a comprehensive roofing system that has a number of components, such as high-quality shingles, roof and deck protection, water and ice shield, ridge-cap shingles for additional protection, and attic ventilation.

Whether it is an old roof or one that has been damaged by wind or hail, the Roof.net professionals are capable of determining the best strategy for solving the problem based on the specific needs of a particular homeowner or property owner. Whether it is a simple problem or there is a need for total replacement of the roof, they can provide the solution.

They can also provide same-day roof repair for those emergency situations like when the roof is damaged by a falling tree or branch, or by strong winds. Same day repair is necessary because water leaking into the home must not be allowed to continue for a long time. This can cause damage to various belongings in the home and may weaken the foundation.

Homeowners and other property owners who would like to know more about the roofing services offered by Roof.net may want to check out their website or contact them through the telephone or via email. They are

open from Monday to Saturday, from 8:00 am to 5:00 pm. For more information about the company, they may also want to follow their Facebook page https://www.facebook.com/roofrepairva.
