

EPS Offers Professional Palm Tree Trimming and Removal Services

January 04, 2021

Pembroke Pines, Florida - January 04, 2021 -
Pembroke Pines, FL-based EPS Landscaping and Tree Service LLC is pleased to announce that they offer professional palm tree trimming and removal services.

The company expects that residents in Broward County already know that they live in an excellent environment for palm trees. However, many are still unaware that palm trees require the same care that other plants need. It is important to make sure that palm trees remain trimmed for shaping when foliage becomes overgrown. Dead fronds look bad in yards and can also cause fires, but palm trees should not just be trimmed at any time. Those interested in their care should wait for the best time for palm tree trimming ? which is during the spring season, when the weather is relatively calm.

The trimming of palm trees should not be done haphazardly either, and it is important to make sure that it is not done to a greater extent than necessary. Healthy fronds should always be left in place in order to protect the palm trees. Due to this, it is best to leave palm tree trimming to professionals who have the experience

and skills needed to determine and execute the optimal palm tree trimming protocol. Such arborists and tree professionals can be found at EPS Landscaping and Tree Service LLC.

There are also cases where simply trimming one?s palm trees will no longer suffice. People may decide that they need to remove them at certain times, such as when the trees are dying or are already dead. Removing palm trees may also be needed when property owners want to add other features, such as a garden or a pool, to their yard. Palm tree roots may also grow larger than expected, so it is important to get rid of them along with the other parts of the tree. Fortunately, EPS Landscaping and Tree Service LLC is always ready to provide palm tree removal services.

In addition to palm tree services, EPS Landscaping and Tree Service LLC also offers tree planting. This service can be done to add some beauty to a property and help people breathe better (since trees absorb carbon dioxide and other pollution from the air). Trees can also be helpful to people?s mental health by reducing stress and anxiety. Tree planting costs some money but it can help save money in the long run. Trees can do this by protecting homes from the harshness of sun rays, which means that homeowners will not need to spend as much energy and money to keep their house cool during summer.

People can choose to plant trees by themselves, but if they want to get the best results, they need to consult professionals, such as the ones at EPS Landscaping and Tree Service LLC. EPS Landscaping and Tree Service LLC understands that trees do not grow well in just any place where they can be planted. They provide their clients valuable advice that helps ensure that the planted trees grow to be strong and healthy.

EPS Landscaping and Tree Service LLC also offers tree relocation services as well. A homeowner may want to move trees for any of a variety of reasons, such as the trees having grown too large for their original location or needing them moved to a different address. No matter the reason, EPS Landscaping and Tree Service LLC has the tools, experience and skills needed to undertake the difficult job of tree relocation. This means that clients will not necessarily have to kill their current trees and plant new ones.

EPS Landscaping and Tree Service LLC has received great reviews for their professional tree related services. Gina Maria Marin says in a 5-Star Google review of EPS, ?I called EPS Landscaping and Tree Service to trim my palms ahead of the last tropical storm. Not only do my palms look fantastic, I didn?t have to be out after the storm picking anything up from my yard. The team was knowledgeable and courteous, and customer service is exceptional. Greg and Jessica will take care of you the right way!?

Cheyn Bartels says in another 5-Star review, ?Had a great experience with EPS. We called for an estimate and not only did they answer the phone immediately, they came out within two hours for a quote. By week?s end, my garden beds were refreshed and looking awesome again! Thank you, Greg and Jessica, for your prompt service and reasonable pricing.?

Those interested in tree removal in Pembroke Pines may visit EPS Landscaping and Tree Services? website to learn more about their full range of professional tree related services. The company welcomes inquiries from all interested parties in their community.
