EPS Landscaping & Tree Service?s Sprinkler System Services Help Florida Lawns Look Their Best

January 05, 2021

Pembroke Pines, Florida - January 05, 2021 - PRESSADVANTAGE -

Pembroke Pines, FL-based EPS Landscaping & Tree Service LLC is pleased to announce that they are offering lawn sprinkler system services to residents of Broward County and the surrounding areas. Florida is famous for being hot and sunny, especially during the summer, and that is why irrigation and sprinkler systems must be put in place in order to maintain healthy lawns and backyards. EPS Landscaping & Tree Service LLC is standing by to equip their customers? homes with the best irrigation systems for their landscaping needs.

The company begins a sprinkler system installation by surveying the property in question. They send a team of experts to the customer?s home and run several tests. During this part of the process, they divide the property into several zones according to the amount of water that each section of the customer?s yard needs. Some examples of zones are garden beds which require more water and different types of sprinklers, as compared to the other parts of the lawn.

Sprinkler systems are made up of three primary parts ? the pipes, pumps and the sprinklers. The pumps power up sprinkler systems as they draw water from the source, direct it through the system and bring them to each area of the yard. An important and helpful feature that can be added to an irrigation system is a rain sensor. Rain sensors are able to detect and inform sprinklers whether they must be turned on or if the lawn already has enough water. This is extremely useful in Florida (which goes into very wet months during certain times of the year).

During the rainy season, sprinkler systems do not need to do much work. Irrigation systems that have rain sensors may seem unnecessary at first, but fully-featured irrigation systems can pay for themselves in the long run. In fact, smart irrigation systems can prevent a variety of issues, including overwatering, underwatering, uneven watering, mushy lawns and inefficient water use. By preventing these potential issues, irrigation systems can actually help homeowners save more money over time.

Since Florida goes through very wet months, the company notes that there are times when members of the community may find that they actually need more drainage than sprinklers. As such, EPS Landscaping and Tree Service LLC is happy to help homeowners by installing drainage channels or French drains to help control the amount of water in their yards and lawns.

EPS Landscaping and Tree Service LLC also offers sprinkler system repair services. Even the best sprinkler systems will have issues and wear down over time. There are several factors, both natural and artificial, that can cause sprinkler systems to malfunction. In fact, they can drain improperly or provide insufficient water to essential areas of the lawn. No matter the issue, the professionals at EPS Landscaping and Tree Service LLC are capable of providing repair services that can get sprinkler systems back to functioning properly.

In addition to lawn related services, EPS Landscaping and Tree Service LLC also offers professional tree services. Due to their expertise and dedication to providing excellent customer service, the company has received glowing reviews from the communities they serve.

Helen Robbins says in a Facebook recommendation, ?EPS has been taking care of my lawn and landscaping for years, and they?ve always been great! Their new company, which concentrates on landscaping and tree services in addition to all their regular services, is amazing! They did my landscape design, and I get so many compliments on my yard. They are honest and reliable. They designed my landscaping and showed me the final plan on a computer. I was able to see what it looked like before they did it, and was able to rearrange it exactly to my liking. Jessica is super talented in knowing what looks good. All you have to do is give her a general idea of what you like, and she does the rest. No guesswork ? you see what you get before they do it, and she can adjust it however you want it! All my neighbors use them too!?

Meanwhile, Gina Maria Marin shares that, ?I called EPS Landscaping and Tree Service to trim my palms

ahead of the last tropical storm. Not only do my palms look fantastic, I didn?t have to be out after the storm picking anything up from my yard. The team was knowledgeable and courteous, and customer service is exceptional. Greg and Jessica will take care of you the right way!?

Those interested in EPS Landscaping and Tree Service LLC?s services can learn more by heading over to the company?s website. They may also contact Greg O'Connell of EPS Landscaping & Tree Service LLC to discuss their property?s sprinkler and drainage needs.
